---

**QUESTION NO: 1**

Oracle9 i provides a database package called `dbms_redefinition` to perform an online rebuild of a table. Which two steps are you recommended to do prior to issuing the `dbms_redefinition.start_redef_table` procedure call? (Choose two).

- A. create an empty interim table with all the desired characteristics
- B. invoke the `dbms_redefinition.can_redef_table` procedure
- C. grant privileges on the interim table
- D. invoke the `dbms_redefinition.sync_interim_table` procedure
- E. create any triggers, indexes, or constraints on the interim table

**Answer: A,B**

**QUESTION NO: 2**

What must you do to enable Automated SQL Execution Memory Management?

- A. Set the instance parameters `SORT_AREA_SIZE`, `BITMAP_MERGE_AREA_SIZE`, `CREATE_BITMAP_AREA_SIZE`, `HASH_AREA_SIZE`, `SORT_AREA_SIZE`, and `SORT_AREA_RETAINED_SIZE` all to `AUTO`.
- B. Set the instance parameters `PGA_AGGREGATE_TARGET` and `WORKAREA_SIZE_POLICY` to appropriate values.
- C. Unset the instance parameters `SORT_AREA_SIZE`, `BITMAP_MERGE_AREA_SIZE`, `CREATE_BITMAP_AREA_SIZE`, `HASH_AREA_SIZE`, `SORT_AREA_SIZE`, and `SORT_AREA_RETAINED_SIZE`.
- D. Execute the `DBMS_STATS.GATHER_SYSTEM_STATS` procedure with appropriate values

**Answer: B**

**QUESTION NO: 3**

When enabling Flashback using a wall-clock time, within what period does the database choose a System Commit Number (SCN)?

- A. one minute of the time specified
- B. one second of the time specified
- C. five minutes of the time specified
- D. five seconds of the time specified

**Answer: C**

---

**QUESTION NO: 4**

What is the meaning of using "character semantics" to create a table?

- A. You specify the width of a column in characters, not in bytes.
- B. You use single letter names of all columns.
- C. You use only character type data types (CHAR, NCHAR, VARCHAR2, NVARCHAR2, CLOB, NCLOB).
- D. All columns are a single character wide.
- E. You use only use CHAR data types.

**Answer: A**

**QUESTION NO: 5**

You decide to activate the resumable space allocation feature for all your database users by enabling the feature in a logon trigger. This causes a statement that requires space beyond a user's quota \_\_\_\_\_.

- A. to wait indefinitely for the quota to be increased, regardless of the timeout setting for other space allocation problems.
- B. to wait in a suspended state until the quota is increased or until the timeout value is reached
- C. to fail because quota limits do not activate the resumable space allocation feature
- D. to invoke the default trigger that resets user quota, if there is free space in the related tablespace

**Answer: B**

**QUESTION NO: 6**

What is required for the Character Set Scanner to operate?

- A. a special schema installed with csminst.sql
- B. a separate tablespace called csscan to store the results
- C. Oracle Enterprise Manager
- D. a GUI capable workstation, because it uses a Java interface

**Answer: A**

**QUESTION NO: 7**

---

Your database contains at least one undo tablespace. You attempt to start an instance in Automatic Undo Management mode, but without specifying an undo tablespace in the initialization parameter file. What happens?

- A. The instance starts up and uses the first available undo tablespace for the automatic undo segments.
- B. The instance will not start.
- C. The instance starts up and uses the SYSTEM rollback segment for all undo entries.
- D. The instance starts up and uses the SYSTEM tablespace for the automatic undo segments.

**Answer: A**

### **QUESTION NO: 8**

Which two are true regarding external tables? (Choose two.)

- A. Indexes cannot be created on external tables.
- B. Indexes can be created on external tables.
- C. External tables can be updated.
- D. External tables are read-only tables.

**Answer: A,D**

### **QUESTION NO: 9**

Examine the statement: `DROP TABLESPACE IND2 INCLUDING CONTENTS AND DATAFILES;`  
What is the result of the statement?

- A. The statement will only succeed if the IND2 tablespace was built using Oracle-Managed Files (OMF) data files.
- B. The contents and data files belonging to the IND2 tablespace are dropped.
- C. The statement will only succeed if the data files belonging to the IND2 tablespace are Oracle-Managed Files (OMF) or if the database was created using OMF.
- D. The contents of the tablespace are dropped along with all its data files except those identified with the Oracle-Managed Files (OMF) naming convention.

**Answer: B**

### **QUESTION NO: 10**

To assist you in migrating your existing LONG columns to LOB data types, the ALTER TABLE syntax has been enhanced to support LONG to CLOB migration and LONG RAW to BLOB
