For the most up-to-date exam questions and materials, we recommend visiting our website, where you can access the latest content and resources.

1. You execute this command:

```
CREATE BIGFILE TABLESPACE big_tbs
    DATAFILE '/u01/oracle/data/big_f1.dbf'
    SIZE 20G;
```

Sufficient storage is available in filesystem /u01.

Which two statements are true about the BIG_TBS tablespace? (Choose two.)

- A. AUTOEXTEND is possible for the datafile
- B. It must be bigger than the largest SMALLFILE tablespace
- C. Additional data files may not be added
- D. It will be a dictionary-managed tablespace by default
- E. It will always have a 32K blocksize

Answer: AC

2. Which statement is true about the INTERSECT operator used in compound queries?

- A. Multiple INTERSECT operators are not possible in the same SQL statement
- B. It processes NULLs in the selected columns
- C. INTERSECT is of lower precedence than UNION or UNION ALL
- D. It ignores NULLs

Answer: B

3. Which three statements are true about advanced connection options supported by Oracle Net for connection to Oracle Database instances? (Choose three.)

- A. Connect Time Failover requires the use of Transparent Application Failover (TAF)
- B. Source Routing requires the use of a name server
- C. Source Routing enables the use of Connection Manager (CMAN) which enables network traffic to be routed through a firewall
- D. Load Balancing can balance the number of connections to dispatchers when using a Shared Server configuration
- E. Load Balancing requires the use of a name server
- F. Connect Time Failover requires the connect string to have two or more listener addresses configured

Answer: CDF

4. Which two statements are true about date/time functions in a session where

NLS_DATE_FORMAT is set to DD-MON-YYYY HH24:MI:SS? (Choose two.)

- A. CURRENT_TIMESTAMP returns the same date and time as SYSDATE with additional details of fractional seconds
- B. SYSDATE can be queried only from the DUAL table
- C. CURRENT_DATE returns the current date and time as per the session time zone
- D. SYSDATE can be used in expressions only if the default date format is DD-MON-RR
- E. SYSDATE and CURRENT_DATE return the current date and time set for the operating system of the database server
- F. CURRENT_TIMESTAMP returns the same date as CURRENT_DATE

Answer: CF

5. A database is configured to use automatic undo management with temporary undo enabled.

An UPDATE is executed on a temporary table.

Where is the UNDO stored?

- A. in the undo tablespace
- B. in the SYSAUX tablespace
- C. in the SGA
- D. in the PGA
- E. in the temporary tablespace

Answer: E

6. You have been tasked to create a table for a banking application.

One of the columns must meet three requirements:

1. Be stored in a format supporting date arithmetic without using conversion functions
2. Store a loan period of up to 10 years
3. Be used for calculating interest for the number of days the loan remains unpaid

Which data type should you use?

- A. INTERVAL YEAR TO MONTH
- B. INTERVAL DAY TO SECOND
- C. TIMESTAMP WITH LOCAL TIMEZONE
- D. TIMESTAMP
- E. TIMESTAMP WITH TIMEZONE

Answer: B

7. In the spfile of a single instance database, LOCAL_LISTENER is set to LISTENER_1. The TNSNAMES.ORA file in \$ORACLE_HOME/network/admin in the database home contains:

```
LISTENER_1 =  
  (ADDRESS =  
    (PROTOCOL = TCP)  
    (HOST = host1.abc.com)  
    (PORT = 1521)  
  )
```

Which statement is true?

- A. Dynamic service registration cannot be used for this database instance
- B. The LREG process registers services dynamically with the LISTENER_1 listener
- C. LISTENER_1 must also be defined in the LISTENER.ORA file to enable dynamic service registration
- D. There are two listeners named LISTENER and LISTENER_1 running simultaneously using port 1521 on the same host as the database instances
- E. The definition for LISTENER_1 requires a CONNECT_DATA section to enable dynamic service registration

Answer: B

8. Which three statements are true concerning logical and physical database structures? (Choose three.)

- A. All tablespaces may have one or more data files
- B. The extents of a segment must always reside in the same datafile
- C. A smallfile tablespace might be bigger than a bigfile tablespace
- D. A segment can span multiple data files in some tablespaces
- E. A segment's blocks can be of different sizes
- F. A segment might have only one extent
- G. Segments can span multiple tablespaces

Answer: CDF
