Invalid value -- press the prompt button or hyperlink for a list of valid values (15,11)
The value entered in the field does not match one of the allowable values. You can see the allowable values by pressing the Prompt button or hyperlink.

OK

Your client wants to set up a new department called ABC Headquarter for their newly acquired company ABC. The client shares the department and location information cross all business units. The HR Administrator has checked that the location code ABCHQ showed up under the Location Table Search Result page under SetID "Share". However, when she tried to attach this location code to the new department she is trying to create, she

got the error message. Which two setups may have caused the error message to be displayed? (Choose two.)

- A. The Location SetID may not be valid for this department.
- B. The Department may have an earlier Effective Date than the Location.
- C. The Location and the Department may not belong to the same Business Unit.
- D. The Location may have been inactivated before the Department's Effective Date.
- E. The Location may not be associated with the proper company that the department is attached to.
- F. The TableSet Control table may not be set up correctly for the Record_Group Location and the Record_Group Department.

Answer: BD
