**QUESTION NO: 1**

Which two statements are true about JAXR support for XML registries? (Choose two.)

- A. The CapabilityProfile tells a client the capability level of a registry.
- B. UDDI registries must support ebXML to be compatible with JAXR.
- C. The UnsupportedCapabilityException is processed for errors from non-Java providers.
- D. The JAXR API declares methods as level 0 or level 1.
- E. JAXR registry clients present an XML schema that defines the infomodel for the provider.

**Answer: A,D**

**Explanation:**

**QUESTION NO: 2**

Which two statements are true about the interaction between a JAXR 1.0 client and a UDDI registry? (Choose two.)

- A. A JAXR client can delete an organization that it published.
- B. A JAXR client CANNOT delete any of the entries in a UDDI registry.
- C. A JAXR client must use HTTPS for updating the information in a UDDI registry.
- D. A JAXR client can query and update the information in a UDDI registry using HTTP.
- E. A JAXR client can delete an organization that it published only if the protect property is set to False.

**Answer: A,C**

**Explanation:**

**QUESTION NO: 3**

Which JAXR interface allows querying a business registry using SQL commands?

- A. javax.xml.registry.Connection at level 0
- B. javax.xml.registry.FederatedConnection at Level 1
- C. javax.xml.registry.BusinessQueryManager at level 0
- D. javax.xml.registry.DeclarativeQueryManager at level 1
- E. javax.xml.registry.BusinessQueryManager at level 1
- F. javax.xml.registry.DeclarativeQueryManager at level 0

**Answer: D**

---

**Explanation:**

**QUESTION NO: 4**

Which two statements are true about the interoperability of Web services developed using the Java EE 5 platform? (Choose two.)

- A. Interoperability is improved by restricting access only to Java clients.
- B. EJB-based endpoints are more difficult for .NET clients to access.
- C. Only servlet-based endpoints are used when exposing services to non-Java clients.
- D. Exposure is limited to simple arrays of concrete types as the signature of Web service methods.
- E. The service must be published in both the .NET and Java UDDIs.
- F. Testing for WS-I Profile conformance improves interoperability.

**Answer: D,F**

**Explanation:**

**QUESTION NO: 5**

A company needs to process DOM documents received from its customers through an EJB3 endpoint. Which two APIs will a developer need to invoke to process these DOM documents? (Choose two.)

- A. UDDI
- B. JAXR
- C. JAXP
- D. JAX-WS
- E. JAXB
- F. StAX

**Answer: C,F**

**Explanation:**

**QUESTION NO: 6**

What are two valid facts about WS-I? (Choose two.)

- A. The I-Stack is a great development tool.
- B. The WS-I promotes and supports generic protocols for the interoperable exchange of

---

messages.

**C.** The WS-I governs languages and protocols such as SOAP, WSDL, and UDDI.

**D.** The WS-I specifies specific rules that address either weaknesses in component specifications or issues of how to combine the collected technology.

**E.** The WS-I has been a guiding force in creating StAX.

**Answer: B,D**

**Explanation:**

### **QUESTION NO: 7**

A company is building a Java EE 5 purchase order processing system. This system will integrate with an external invoicing system as part of the purchase order approval process. A developer created a new client application to access the invoicing system using request-response, but a new service call is receiving errors every time it invokes the necessary Web service.

Which statement is true about the Body element of the SOAP reply message?

**A.** It must NOT contain any fault elements.

**B.** It will contain a fault element for each error.

**C.** It will contain exactly one fault element.

**D.** It must contain zero or one fault element.

**E.** It must contain an array of fault elements.

**Answer: D**

**Explanation:**

### **QUESTION NO: 8**

A company is building a customer relationship management system that is to be deployed on a customer's network, and they want software functions to be reused and combined in different modules in the system. The Director of Technology has determined that the new system should utilize both Web services and a Service Oriented Architecture (SOA). Which two statements about Web services in an SOA are correct? (Choose two.)

**A.** A Web service must be discovered from a UDDI registry in an SOA.

**B.** SOA and Web services both use the HTTP protocol at the transport layer.

**C.** A Web service must publish itself to a UDDI registry to become part of an SOA.

**D.** SOA is a way to design a system and Web services are a possible implementation.

**E.** SOA is used for stateless invocations, and Web services for stateful invocations.

**F.** SOA emphasizes the concept of service encapsulation and Web services fulfill a service
