Answer: D

QUESTION 4

You work as a Database Administrator for . The company uses MySQL as its database development platform. You have created a table named Employees in the database. You want to display the names of the employees whose salary is more than \$5000, but you do not want to display any duplicate content. Therefore, you have written the following query:

```
SELECT emp_id, DISTINCT emp_name WHERE salary > 5000
```

```
FROM Employees;
```

Which of the following statements is true about the above query?

- A. The statement will display only unique names whose salary is more than \$5000.
- B. The UNIQUE clause should be used in place of the DISTINCT clause.
- C. The statement will give an error.
- D. The statement will display those records whose salary is more than \$5000.

Answer: C

QUESTION 5

Fill in the blank with the appropriate word.

The _____ data type defines a date that is combined with a time of day along with fractional seconds that is based on a 24-hour clock.

Answer: datetime

QUESTION 6
