- A. real-time media duplication to a remote site
- B. sending physical media to an alternate location
- C. creating copies of existing media to store in the same data center
- D. storing media in a fire and flood proof safe that uses a magnetic seal

**Answer: A,B**

**QUESTION NO: 2**

Which two UNIX commands produce output containing the name of the computer system you are logged into? (Choose two.)

- A. uname -a
- B. hostname
- C. lanscan -a
- D. hostname -a

**Answer: A,B**

**QUESTION NO: 3**

A new robot and drive have been added to a Solaris media server. The current operating system device drivers do NOT support variable length record sizes. Which file must be modified to make these drives write in variable length record sizes?

- A. sg.conf
- B. kernel.drv
- C. device.conf
- D. st.conf

**Answer: D**

**QUESTION NO: 4**

Which file contains the network name and IP address information used when performing local

---

name and IP address resolution?

- A. /etc/hosts
- B. /etc/ipnames
- C. /etc/inetd.conf
- D. /etc/nsswitch.conf

**Answer: A**

#### **QUESTION NO: 5**

Which command syntax can be used to verify that a port name can be resolved?

- A. ping machine\_name port\_name
- B. ping ip\_address -p port\_name
- C. telnet machine\_name port\_name
- D. telnet machine\_name -port port\_name

**Answer: C**

#### **QUESTION NO: 6**

Which UNIX command displays the names resolved by broadcast?

- A. arp
- B. ping
- C. nsswitch
- D. nslookup

**Answer: A**

#### **QUESTION NO: 7**

Which file is reviewed to ensure that network ports are resolved correctly?

- A. system
- B. inetd
- C. nsswitch
- D. services

**Answer: D**

---

**QUESTION NO: 8**

Which three factors affect the data transfer speed of a remote full backup? (Choose three.)

- A. network throughput
- B. disk I/O
- C. media density
- D. buffer size
- E. the number of files that have changed

**Answer: A,B,D**

**QUESTION NO: 9**

A tape is loaded into the tape drive called `/dev/tape1`. Which two commands help to prove that a tape device is available for use by the operating system? (Choose two.)

- A. `ls -l /dev/tape1`
- B. `sgscan /dev/tape1`
- C. `mt -f /dev/tape1 rewind`
- D. `tar -cvf /dev/tape1 /etc`

**Answer: C,D**

**QUESTION NO: 10**

For a calendar schedule, to which three backup types does the option `etries` allowed after runday apply? (Choose three.)

- A. full
- B. user directed
- C. differential incremental
- D. cumulative incremental
- E. user archive

**Answer: A,C,D**

**QUESTION NO: 11**

Which three conditions must be met before successfully writing to and reading from a tape device? (Choose three.)
