QUESTION NO: 1

What is the SAN Extension solution that utilizes multiple wavelengths across a fiber pair for transport and is amplifiable for longer distance applications?

A. CWDM
B. FC over SONET/SDH
C. FCIP
D. Dark Fiber
E. DWDM

Answer: E

QUESTION NO: 2

What are four business benefits of implementing Virtual SANs (VSANs)? (Choose four.)

A. better utilization of port resources
B. reduction of equipment costs
C. can build large scale consolidated networks, while providing security and isolation
D. can be implemented on any switch, regardless of the vendor
E. fewer platforms to manage

Answer: A,B,C,E

QUESTION NO: 3

Which three MDS features enable SAN island consolidation? (Choose three.)

A. role based access control
B. separate fabric services per Virtual SAN (VSAN)
C. inter-VSAN routing
D. Device Manager
E. FSPF

Answer: A,B,C

QUESTION NO: 4

Which two Cisco products (families) support FCIP? (Choose two.)

A. MDS-9000

B. ONS 15540 ESPx

C. ONS 15454

D. 7200

E. ONS 15530

Answer: A,D

QUESTION NO: 5

Which characteristics differentiate Cisco MDS and McData?

A. high availability and performance

B. integrated multiprotocol support and performance

C. integrated multiprotocol support and high availability

D. scalability and performance

Answer: A

QUESTION NO: 6

What is the function of the Advanced Services Module (ASM)?

A. delivers hardware-assisted, network-hosted virtualization and replication services

B. acts as a gateway for a Fibre Channel device to the Internet

C. enables pooling of heterogeneous storage for increased storage utilization, simplified storage management, and reduction of the total cost of storage ownership

D. provides a platform for multiprotocol connectivity to existing storage devices

Answer: A

QUESTION NO: 7

A customer wants to use scripting on the MDS platform.Which management interface should they use?

A. RME

B. Command Line Interface (CLI)

C. Fabric Manager

D. Element Manager

Answer: B

QUESTION NO: 8

The support of multiple protocols within the MDS 9000 family _____. (Choose two.)

A. allows the customer to offer Fibre Channel connectivity and low-cost iSCSI connectivity through the fabric
B. allows the customer to design fault tolerant solutions with the bandwidth aggregation capabilities of the product
C. allows the customer cost-effective business continuance solutions with FCIP connectivity through the fabric
D. allows the platform to support cost-effective DAS storage connectivity

Answer: A,C

QUESTION NO: 9

Which customer issues are addressed by multiprotocol support as provided by the MDS?

A. disaster recovery and reliability
B. consolidation and business continuance
C. performance and availability
D. connectivity and support

Answer: B

QUESTION NO: 10

Which SAN Extension solution is capable of transporting Fibre Channel across an IP infrastructure?

A. CWDM
B. FCIP
C. iSCSI
D. DWDM
E. iFCP

Answer: B

QUESTION NO: 11
