---

**QUESTION NO: 1**

Which task is part of a Staging Plan Development onsite discovery workshop?

- A. Identify implementation risks.
- B. Validate network management design.
- C. Verify customer site locations and contacts.
- D. Create test cases.

**Answer: D**

**QUESTION NO: 2**

Which task is part of executing an operations test plan?

- A. Review changes with key stakeholders.
- B. Identify risks and establishing contingencies.
- C. Notify impacted parties of upcoming cutover.
- D. Validate product and software functionality as required in the design.

**Answer: D**

**QUESTION NO: 3**

When identifying and assessing the technologies and services required for a routing and switching solution, which two tasks are performed prior to producing a technology requirements document for the customer? (Choose two.)

- A. Produce a final draft of the technology requirements document for the customer.
- B. Assess findings and validate the technology requirements with key stakeholders and business owners.
- C. Determine which technologies and services will create a routing and switching solution to satisfy the identified business requirements.
- D. Assess and compare the capabilities of available technologies and services that will address the stated business requirements of the customer.
- E. Compile the findings into a technology requirements document.

**Answer: C,D**

**QUESTION NO: 4**

---

Which task is conducted during Migration Plan Development?

- A. Identify risk and propose a risk mitigation strategy.
- B. Identify staff development requirements against business initiatives, goal, and technical activities required to support the infrastructure solution.
- C. Obtain and review security procedures and policies.
- D. Perform an automated scan of ports to determine potential vulnerabilities.

**Answer: A**

**QUESTION NO: 5**

Which three activities within the prepare phase are performed to create a recommendation for an operations technology strategy for people, processes, and tools to support the operations and management of a routing and switching solution? (Choose three.)

- A. Analyze the documented business and technology requirements.
- B. Identify hardware and software products, features, and functionalities.
- C. Analyze the technology infrastructure and operational requirements.
- D. Assess current network infrastructure and installed applications.
- E. Produce a documented operations technology strategy.
- F. Identify and assess the operations requirements for the routing and switching solution.

**Answer: A,E,F**

**QUESTION NO: 6**

What is the correct order for performing the activities in the Change Management service component?

- A. Evaluate, Communicate, Accept, Schedule and Execute, Originate, Close
- B. Evaluate, Originate, Schedule, Execute, Access, Communicate, Close
- C. Originate, Schedule, Execute, Evaluate, Access, Communicate, Close
- D. Originate, Evaluate, Accept and Schedule, Execute, Communicate, Close

**Answer: D**

**QUESTION NO: 7**

Which task is part of the Problem Management service component?

- 
- A. Monitor infrastructure.
  - B. Gather symptom information including traces, logs, and events.
  - C. Isolate incident.
  - D. Compare test parameters against service-level requirements.

**Answer: B**

**QUESTION NO: 8**

What are two typical activities that are conducted as part of Security Assessment? (Choose two.)

- A. Perform intrusion audits.
- B. Categorize security incidents.
- C. Create a performance baseline for Security Assessment.
- D. Assess network infrastructure software and configurations.

**Answer: A,C**

**QUESTION NO: 9**

Which task is conducted during execution of a system acceptance test plan?

- A. Verify that all participants are ready.
- B. Record and review results with key stakeholders and business owners.
- C. Present and discuss systems acceptance test results with the customer.
- D. Verify that escalation path is in place to help manage and mitigate problems with test cases.

**Answer: B**

**QUESTION NO: 10**

Which definition best describes the service component for Business Case Development?

- A. a service component activity to help ensure that all systems design requirements are identified within the prepare phase
- B. a service component that addresses business requirements of the customer within the plan phase
- C. a prescribed set of activities and tasks that creates a business case that cites business and financial justifications for a customer considering the benefits of investing and adopting a routing and switching solution within the prepare phase
- D. a prescribed set of activities and tasks that creates a business case that cites business and financial justifications for a customer considering the benefits of investing and adopting a routing
