Configuring and Deploying a Private Cloud with System Center 2012

DEMO

QUESTION 1

You plan to deploy a System Center 2012 infrastructure. You plan to create and deploy a service named CloudService1.

You need to recommend a solution to deploy CloudService1 to a Windows Azure subscription.

What should you include in the recommendation?

A. System Center 2012 Service Manager
B. System Center 2012 Orchestrator
C. System Center 2012 Operations Manager
D. System Center 2012 App Controller

Answer: D

Question 2

Developers at Contoso have two Windows Azure subscriptions. Contoso creates a partnership with another company named A. Datum. The A. Datum network contains a System Center 2012 Virtual Machine Manager (VMM) infrastructure that contains three clouds. Developers at A.Datum have two Windows Azure subscriptions.

You deploy System Center 2012 App Controller at A.Datum.

You plan to manage the clouds and the Windows Azure subscriptions for both companies from the App Controller portal. You need to identify the minimum number of subscriptions and the minimum number connections required for the planned management.

How many connections and subscriptions should you identify?

A. two connections and two subscriptions
B. four connections and two subscriptions
C. four connections and four subscriptions
D. two connections and four subscriptions
E. eight connections and four subscriptions

Answer: D

Question 3

1

You have a System Center 2012 Service Manager infrastructure that contains a Self-Service Portal. The corporate network access policy states that users must be assigned the minimum number of permissions to access the network resources.

You need to ensure that a user named Testuser5 can create incidents by using the Self-Service Portal. The solution must meet the requirements of the network access policy .

Which permissions should you assign to Testuser5 from Site Settings?

A. Design
B. Full Control
C. Read
D. Contribute

Answer: D

Question 4

Your company has a private cloud that is managed by using a System Center 2012 Operations Manager infrastructure. You deploy Microsoft Share Point Foundation 2010. You have an Operations Manager Web Part.

You need to ensure that the Web Part is available on the SharePoint site. What should you do first?

A. Configure the Web Part solution.
B. Deploy the Web Part to the SharePoint site.
C. Configure the Web Part to use shared credentials.
D. Add the Web Part to a webpage.

Answer: B

Question 5

Your network contains an Active Directory forest named contoso.com. You install System Center 2012 Virtual Machine Manager (VMM) on a server named Server1.

Users report that they fail to log on to the Virtual Machine Manager Self-Service Portal (VMMSSP). You need to ensure that users call log on to the VMMSSP.

What should you do first?

A. From the Virtual Machine Manager command shell, run the **New-SCUserRole** cmdlet and the **Set-SCUserRole** cmdlet.

B. From Internet Information Services (IIS) Manager on Server1, modify the Authentication settings.

C. From Authorization Manager, create a role definition and a role assignment.

D. From the VMM Administrator Console, run the Create Run As Account Wizard

Answer: A

Question 6

You have a System Center 2012 Virtual Machine Manager (VMM) infrastructure that contains a server named Server1. A user named User1 attempts to add a Hyper-V host named Server2 to the fabric. User1 enters the IP address of Server2 and receives the following error message:

`"Access has been denied while contacting the server Server2."`

You verify that User1 is assigned the Delegated Administrator User Role. You need to ensure that User1 can add Server2 to the fabric. What should you do?

A. Assign the Administrator User Role to User1.

B. Add User1 to the Domain Admins security group.

C. Modify the logon account for the System Center Virtual Machine Manager Agent service on Server1.

D. Create a Run As Account that is a member of the local Administrators group on Server2.

Answer: D

Question 7

Your company has a datacenter in Los Angeles. The datacenter contains a server named VMM1 that has System Center 2012 Virtual Machine Manager (VMM) installed.

You plan to deploy a service named SRV1. SRV1 will contain three tiers. Each tier will contain 8 instances.

You need to configure the service template to ensure that when an application in SRV1 is upgraded, SRV1 remains available. What should you configure for each tier?

A. the preferred deployment order

B. the maximum instance count

C. the minimum instance count

D. the number of upgrade domains

E. the preferred servicing order

Answer: D

3
