QUESTION NO: 1

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 R2 installed.

ABC.com has a server, named ABC-SR07, which has two physical disks installed. The C: drive hosts the boot partition, while the D: drive is not being used. Both disks are online.

You have received instructions to create a virtual machine on ABC-SR07. Subsequent to creating the virtual machine, you have to connect the D: drive to the virtual machine.

Which of the following is TRUE with regards to connecting a physical disk to a virtual machine?

- A. The physical disk should not be online.
- B. The physical disk should be uninstalled and re-installed.
- C. The physical disk should be configured as a striped disk.
- D. The physical disk should be configured as a mirrored disk.

Answer: A

Explanation:

QUESTION NO: 2

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 R2 installed.

You are running a training exercise for junior administrators. You are currently discussing the new VHD format called VHDX.

Which of the following is TRUE with regards to VHDX? (Choose all that apply.)

- A. It supports virtual hard disk storage capacity of up to 64 GB.
- B. It supports virtual hard disk storage capacity of up to 64 TB.
- C. It does not provide protection against data corruption during power failures.
- D. It has the ability to store custom metadata about the file that the user might want to record.

Answer: B,D

Explanation:

QUESTION NO: 3

You work as a network administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 installed. The Hyper-V server role is installed on a server named ABC_SR07.

ABC_SR07 has a legacy network card that you use when creating a virtual machine named ABC_VT01.

What is the first thing you should do when assigning bandwidth to ABC_VT01?

- A. You need to install a Hyper-V Virtual Switch on ABC_SR07.
- B. You need to install Integration Services on ABC_VT01.
- C. You need to remove the legacy network card and replace it with a new one.
- D. You need to install a second legacy network card on ABC_SR07.
- E. You need to create an external virtual network.

Answer: C

Explanation:

The legacy network adapter does not support bandwidth management

QUESTION NO: 4

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 R2 installed, and all workstations have Windows 8 installed.

You are running a training exercise for junior administrators. You are currently discussing a Windows PowerShell cmdlet that activates previously de-activated firewall rules.

Which of the following is the cmdlet being discussed?

- A. Set-NetFirewallRule
- B. Enable-NetFirewallRule
- C. Set-NetIPsecRule
- D. Enable-NetIPsecRule

Answer: B

Explanation:

QUESTION NO: 5

You work as a senior administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 R2 installed, and all workstations have Windows 8 installed.

You are running a training exercise for junior administrators. You are currently discussing the Always Offline Mode.

Which of the following is TRUE with regards to the Always Offline Mode? (Choose all that apply.)

- A.** It allows for swifter access to cached files and redirected folders.
- B.** To enable Always Offline Mode, you have to satisfy the forest and domain functional-level requirements, as well as schema requirements.
- C.** It allows for lower bandwidth usage due to users are always working offline.
- D.** To enable Always Offline Mode, you must have workstations running Windows 7 or Windows Server 2008 R2.

Answer: A,C

Explanation:

QUESTION NO: 6

You work as an administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. All servers on the ABC.com network have Windows Server 2008 R2 installed. Some of ABC.com's workstations have Windows 7 installed, while the rest have Windows 8 installed.

After installing a new Windows Server 2012 R2 computer in the ABC.com domain, you configure it to run the File and Storage Services server role. You are instructed to create a shared folder on the new server, and configure the use of Previous Versions for restoring files located in the shared folder.

Which of the following actions should you take?

- A.** You should consider configuring the Shadow Copies settings on the new server.
- B.** You should consider configuring the Snapshot settings on the new server.
- C.** You should consider configuring the Background Copy settings on the new server.
