QUESTION NO: 1

You work as the network administrator for a Microsoft Windows Server 2008 domain named ABC.com. ABC.com has a Development division which utilizes two organizational units (OU) named DevelopUsers and DevelopComputers for user and computer account storage. The Development division user and computer accounts are configured as members of global security groups named DevUsers and DevComputers.

During the course of the week you configure two Password Settings objects for Development division members named CredSettings01 and CredSettings02. You additionally configure a minimum password length of 10 for CredSettings01 and 9 for CredSettings02. ABC.com wants you to determine the required password length minimum for Development division users.

What minimum password length should be configured for CredSettings01 applied to DevUsers?

A. You should configure the minimum password length to 9.
B. You should configure the minimum password length to 10.
C. You should configure the minimum password length to 5.
D. You should configure the minimum password length to 4.

Answer: B
Explanation:

QUESTION NO: 2

You are hired by ABC.com to administrate a Microsoft Windows Server 2012 domain named ABC.com. ABC.com utilizes a computer named ABC-DC01 which hosts the File Server Resource Manager role service. A pre-configured quota threshold has been configured to send an email alert when 80% of the quota has been used.

During the course of the week ABC.com instructs you to configure e-mail notification to your account to occur in event of the threshold being exceeded.

Which action ensures e-mail notification would be utilized?

A. You should consider creation of a Data Collector Set (DCS).
B. You should consider configuring Windows Resource Monitor.
C. You should consider configuring File Server Resource Manager Options.
D. You should consider creating a quota template.

Answer: C
Explanation:

QUESTION NO: 3

You are hired by ABC.com to administrate a Microsoft Windows Server 2012 domain named ABC.com. ABC.com utilizes an organizational unit (OU) named FileServ for housing all File Server computer accounts in the domain.

You need to be able to track access files on the File servers.

Which of the following actions should you consider?

A. You should consider configuring the Account Logon auditing category.
B. You should consider configuring the Object Access auditing category.
C. You should consider configuring the Global Object Access Auditing category.
D. You should consider configuring the Directory Service Access auditing category.

Answer: B
Explanation:

QUESTION NO: 4

You are hired by ABC.com to administrate a Microsoft Windows Server 2012 domain named ABC.com. ABC.com utilizes a computer named ABC-DC01 which hosts the DNS service and File Server Resource Manager role service.

ABC.com Development division members utilize a folder named DevShare for storage purposes. You are required to configure a notification solution that is triggered by Development division members saving image and word documents to DevShare.

Which of the actions ensure the notification solution utilizes e-mail?

During the course of the day you receive instruction to configure e-mail notification if Development division members save image files to DevShare.

Which of the following should be configured on ABC-DC01?

A. You should consider configuring a file group.
B. You should consider configuring a file screen template.
C. You should consider configuring Quota Management.

D. You should consider configuring File Management Tasks.

Answer: A
Explanation:

QUESTION NO: 5

You are hired by ABC.com to administrate a Microsoft Windows Server 2012 domain named ABC.com. ABC.com domain controllers run Microsoft Windows Server 2012 and client computers run Microsoft Windows 8.

Hard disk information is secured using BitLocker Drive Encryption (Bitlocker). ABC.com wants a solution implemented using the minimum server features and roles to support the Network Unlock feature.

Which of the following servers hould be utilized for the feature?

A. A Domain Controller
B. A DHCP server
C. A DNS Server
D. A Windows Deployment Server
E. An Application Server
F. A Web Server
G. A File and Print Server
H. A Windows Server Update Services server

Answer: D
Explanation:

QUESTION NO: 6

You are hired by ABC.com to administrate a Microsoft Windows Server 2012 domain named ABC.com. ABC.com utilizes two computer named ABC-DC01 and ABC-DC02. ABC-DC01 host the DHCP, DFS Namespace and DFS replication roles and ABC-DC02 hosts the NPS, DNS, DFS Namespace and DFS Replication roles.

ABC-DC01 and ABC-DC02 are members of a DFS Replication group KingReplica. You are required to reduce network bandwidth utilized by the replication process.

Which of the actions would decrease utilized bandwidth over a low-speed WAN connection?
