QUESTION NO: 1

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the use of the Queue <T> collection type.

Which of the following is TRUE with regards to the Queue <T>collection type?

A. It represents a first in, first out (FIFO) collection of objects.
B. It represents a last in, first out (LIFO) collection of objects.
C. It represents a collection of key/value pairs that are sorted by key based on the associated IComparer<T> implementation.
D. It represents a list of objects that can be accessed by index.

Answer: A
Explanation:

QUESTION NO: 2

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You have written the following code segment:

```
int[] filteredEmployeeIds = employeeIds.Distinct().Where(value => value !=
employeeIdToRemove).OrderByDescending(x => x).ToArray();
```

Which of the following describes reasons for writing this code? (Choose two.)

A. To sort the array in order from the highest value to the lowest value.
B. To sort the array in order from the lowest value to the highest value.
C. To remove duplicate integers from the employeeIds array.
D. To remove all integers from the employeeIds array.

Answer: A,C
Explanation:

QUESTION NO: 3
You work as a senior developer at ABC.com. The ABC.com network consists of a single domain

You are running a training exercise for junior developers. You are currently discussing the use of a method that moves the SqlDataReader on to the subsequent record.

Which of the following is the SqlDataReader method that allows for this?

A. The Read method.
B. The Next method.
C. The Result method.
D. The NextResult method.

Answer: A
Explanation:

QUESTION NO: 4

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You have received instructions to create a custom collection for ABC.com. Objects in the collection must be processed via a foreach loop.

Which of the following is TRUE with regards to the required code?

A. The code should implement the ICollection interface.
B. The code should implement the IComparer interface.
C. The code should implement the IEnumerable interface.
D. The code should implement the IEnumerator interface.

Answer: C
Explanation:

QUESTION NO: 5

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the use of LINQ queries.

Which of the following is NOT considered a distinct action of a LINQ query?

A. Creating the query.
B. Obtaining the data source.
C. Creating the data source.
D. Executing the query.

Answer: C
Explanation:

QUESTION NO: 6

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing a method that Reads data from the specified file. The reads occur at the position specified by the file pointer.

Which of the following is the method being discussed.

A. The ReadFileEx method.
B. The OpenFile method.
C. The ReadFile method.
D. The OpenEncryptedFileRaw method.
E. The ReadFileScatter method.

Answer: C
Explanation:

QUESTION NO: 7

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You have written code that includes the DataContractSerializer class. The code also includes a DataContractSerializer class property that obtains the component used to dynamically map xsi:type declarations to known contract types.

Which of the following is the property included in the code?

A. The DataContractResolver property.
