QUESTION NO: 1

You are employed as a developer at ABC.com. ABC.com has ABC.com has a single Active Directory domain, named ABC.com. ABC.com makes use of Microsoft Visual Studio 2012 for development purposes.

You have been assigned as the product owner of a new ABC.com application. You are in possession of the list of product backlog items (PBIs) that includes assigned business values for the initial distribution of the application.

A well-known development team and scrum master has been assigned to you. You have previously established duration of the intended sprint.

You are now in the process of using the current backlog as the bases for the release schedule. You have tasked the development team with preparing high level evaluations to complete each PBI. You will then allocate the PBIs to various sprints to define the release.

To complete the process, you will schedule the release.

Which of the following should you use to schedule the release?

A. Microsoft PowerPoint storyboarding.
B. The Iteration Planning workbook.
C. The Team Foundation Power Tools.
D. The Feedback Manager.

Answer: B
Explanation:
