**QUESTION NO: 1**

Which application consideration is important for collaboration capabilities, including voice, video, and instant messaging to users of mobile devices such as Android, Apple iOS smartphones, and tablets?

- A. Quality of service
- B. Dual SSID design
- C. Rate limiting
- D. Single SSID design

**Answer: A**

**Explanation:**

**QUESTION NO: 2**

Which feature that is available in Cisco IOS Software is recommended to be positioned at the network access layer?

- A. Mediatrace
- B. NBAR2
- C. Media Services Proxy
- D. Flow Metadata

**Answer: C**

**Explanation:**

**QUESTION NO: 3**

Which statement describes the cloud security feature of the Cisco Cloud Intelligent Network?

- A. The Cloud Intelligent Network can be used to expand or scale up "on demand" in case of a surge in network demand.
- B. The Cloud Intelligent Network ensures that only authentic users and devices get access to information based on their roles and responsibility in an organization
- C. In Cloud Intelligent Network, you can manage a network in an easy manner through centralized monitoring.
- D. The Cloud Intelligent Network guarantees a better user experience by cutting down latency, providing better application performance and optimization.

**Answer: B**

---

**Explanation:**

**QUESTION NO: 4**

Which two statements about Cisco Cloud Intelligent Network are true? (Choose two.)

- A. It enables users to access their home network from their enterprise network.
- B. It provides single level service level agreements to customers.
- C. It integrates the network with the unified data center delivering a powerful user experience.
- D. It allows simplified management of the network through centralized monitoring.
- E. It is extremely vulnerable to web-based malware.

**Answer: C,D**

**Explanation:**

**QUESTION NO: 5**

In designing a BYOD solution, which implementation is based on extending traditional guest wireless access and providing similar guest-like wireless access for employee personal devices?

- A. Advanced
- B. Basic
- C. Limited
- D. Enhanced

**Answer: B**

**Explanation:**

**QUESTION NO: 6**

Which advanced WAN optimization functionality is provided by Cisco WAAS?

- A. Application-specific acceleration
- B. Optimum resource usage
- C. Virtualization platform
- D. Automatic route optimization

**Answer: A**

---

**Explanation:**

**QUESTION NO: 7**

What are two characteristics of Smart Business Architecture? (Choose two.)

- A. It has the drawback of not being advanced technology-ready.
- B. It is targeted at organizations with 200 to 1000 connected users.
- C. Its design requires midlevel IT capabilities.
- D. It consists of three primary modular yet interdependent components.
- E. Its design is sophisticated as compared to Cisco Validated Designs.

**Answer: B,D**

**Explanation:**

**QUESTION NO: 8**

Which of these choices optimizes power consumption, space requirements, device utilization, maintenance operations, and service speed?

- A. Cisco Catalyst 6500 Series Switches
- B. VDCs
- C. VSS
- D. vPC

**Answer: B**

**Explanation:**

**QUESTION NO: 9**

Which service helps in providing cloud-based security services?

- A. CiscoWAAS
- B. Cisco Hosted Collaboration Solution Connector
- C. Cisco Cloud Web Security Connector
- D. CTERA Connector

**Answer: C**
