QUESTION NO: 1

Which two statements are correct about Cisco Validated Design or CVD? (Choose two)

- A. CVD consists of systems and solutions that are designed tested and documented to facilitate and improve customer deployments
- B. CVD is a prescriptive, scalable, flexible design to quickly deploy a full-service network.
- C. CVD gets the design working the first time by using validated configurations and topologies.
- D. CVD implementations are mainly partner-led
- E. CVD consists of three primary modular yet interdependent components

Answer: A,B

Explanation:

QUESTION NO: 2

Which is a software feature available in Cisco IOS Software recommended to be positioned at the network access layer?

- A. Flow Metadata
- B. Media Services Proxy
- C. NBAR2
- D. Mediatrace

Answer: C

Explanation:

QUESTION NO: 3

In which wireless deployment mode is no wireless controller used?

- A. Autonomous
- B. FlexConnect
- C. Centralized
- D. Converged Access

Answer: A

Explanation:

QUESTION NO: 4

Which feature of a Cisco Cloud Intelligent Network provides a consistent experience across physical and virtual infrastructure, across branch, DC/HG, and cloud?

- A. Optimal experience
- B. Pervasive security
- C. Simplified operations
- D. Lower total cost of ownership

Answer: B

Explanation:

QUESTION NO: 5

Which high availability design consideration produces savings by reducing the number of power supplies required per switch and the number of outlets required in the wiring closet?

- A. StackPower
- B. Spanning VLANs
- C. QoS
- D. Gateway redundancy

Answer: A

Explanation:

QUESTION NO: 6

Which cloud connectors provide additional reliability through redundant, localized call processing at the customer site during network outages'?

- A. Cisco Cloud Storage Connector
- B. WebEx Cloud Connected Audio
- C. Cisco Unified Border Element (Cisco UBE)
- D. Cisco Unified SRST

Answer: B

Explanation:

QUESTION NO: 7

Which option touches on the data flows involved with management applications of the Cisco EnergyWise architecture?

- A. Protocol Operation
- B. Monitoring Power
- C. Controlling Power
- D. Cisco Prime LMS

Answer: B

Explanation:

QUESTION NO: 8

The concern of one of your customers is, "How do I quickly isolate and resolve application performance problems with the Cisco ISR-AX solution?" Which feature of the Cisco solution is a response to this query?

- A. With the Cisco solution, you can reduce Application Latency by accelerating applications with full optimization across the WAN
- B. With the Cisco solution, you can gain Visibility into encrypted wireless traffic
- C. With the Cisco solution, you can provide application visibility to 1000+ applications with metrics such as Application Response Time, Jitter and bandwidth
- D. The Cisco solution provides WAN optimization for every size site

Answer: C

Explanation:

QUESTION NO: 9

One of the benefits of Cisco ISR-AX is that mission-critical applications get priority and the optimal path can be selected based on the application type. Which capability offers this benefit?

- A. Acceleration and optimization
- B. Application-level optimization
- C. Application-level visibility
- D. Application-level control

Answer: C
