**QUESTION NO: 1**

A technician is executing the Random Access Memory (RAM) resident test on a Media Processing Server (MPS) 500. Which file is being modified?

- A. vpshosts
- B. bootptab
- C. tms.cfg
- D. hosts

**Answer: B**

**QUESTION NO: 2**

Select the correct statement regarding the Telephony Media Server (TMS) 2500 motherboard.

- A. The TMS-2500 contains Phone Line Interfaces (PLIs).
- B. The TMS-2500 contains six configurable Digital Signal Processors (DSPs).
- C. The TMS-2500 contains redundant Central Processing Units (CPUs).
- D. The TMS-2500 contains four system memory slots.

**Answer: B**

**QUESTION NO: 3**

A technician wants to configure PCAnywhere to control the remote PC using the TCP/IP connection. Which tab will the technician access to configure this connection?

- A. Security Options
- B. Settings
- C. Automated Tasks
- D. Connection Info

**Answer: D**

**QUESTION NO: 4**

A technician receives a replacement TMS assembly from the parts depot. The technician makes all the necessary connections to the Application Processor, but the TMS assembly will NOT boot. What action will boot the Media Processing Server (MPS) 500?

- A. Edit the hosts file with the new Ethernet address of the TMS assembly.

- 
- B. Edit the bootptab file with the new IP address of the TMS assembly.
  - C. Edit the ethers file with the new Ethernet address of the TMS assembly.
  - D. Edit the bootptab file with the new Ethernet address of the TMS assembly.

**Answer: D**

#### **QUESTION NO: 5**

A technician sees the following output on an Application Processor monitor. VMM: Initiating deactivation of MMF [NUMDEMO] VMM: Successfully deactivated [NUMDEMO] Which command did the technician enter to show this output?

- A. vmm mmfdeactivte numdemo
- B. vmm mmfrecord numdemo
- C. vmm deactivate numdemo
- D. vmm mmfunload numdemo

**Answer: D**

#### **QUESTION NO: 6**

A technician is configuring a Media Processing Server (MPS) 500 and wants to allow an application to be notified if the host does NOT respond after 30 seconds. Which configuration will enable this requirement?

- A. h1 p 1-24 ertimer 30
- B. h1 p 1-24 ertimeout 30
- C. h1 p 1-24 er 30
- D. h1 p 1-24 ermaxtime 30

**Answer: C**

#### **QUESTION NO: 7**

A technician wants to establish connectivity between the internal cabinet devices in the MPS 500 standalone chassis configuration. What is the standard Local Area Network setup in this situation?

- A. Private LAN.
- B. Port based VLAN's configured for each device..
- C. LAN incorporated as part of the customer LAN.
- D. Protocol based VLAN's configured for each device.

---

**Answer: A**

**QUESTION NO: 8**

Which command is entered at the command prompt to use Debugging, Logging, and Tracing (DLT) from remote systems?

- A. dlt -C vps.N
- B. dlt -R vps.N
- C. vps.N -C
- D. dlt vps.N

**Answer: A**

**QUESTION NO: 9**

A technician configures the tms.cfg file for two spans on a Media Processing Server (MPS) 500 system. Which configuration file needs to be modified to associate the Call Control Manager (CCM) with 48 phone lines?

- A. tms.cfg
- B. ase.cfg
- C. gen.cfg
- D. vos.cfg

**Answer: D**

**QUESTION NO: 10**

Which value most accurately reflects the typical total power consumption for the MPS 500 stand-alone chassis?

- A. 1000 Watts
- B. 150 Watts
- C. 600 Watts
- D. 300 Watts

**Answer: D**

**QUESTION NO: 11**
