QUESTION NO: 1

You insert an image into an AP Div element but are unable to create a hotspot on the image. What should you do?

- A. Set the Overflow property of the AP Div element to Visible.
- B. Set the Zindex property of the AP Div element to zero.
- C. Set the link on the image to #.
- D. Set the Hide All Visual Aids option to Off.

Answer: D

QUESTION NO: 2

You incorporate user interaction on a Web page by using a Spry widget. You want to change the color of the Web page. What should you do?

- A. Edit the widget structure.
- B. Edit the widget behavior.
- C. Edit the widget styling.
- D. Edit the widget property.

Answer: B

QUESTION NO: 3

You create a Web page and link it to an external CSS file. You copy a table with formatted text from a Microsoft Word document to the Web page by using the Paste Special option. From the Paste Special dialog box, you select the Text with structure plus full formatting option. What is the expected result when you copy the table to the Web page?

- A. CSS classes are added to the external style sheet.
- B. CSS IDs are added to the external style sheet.
- C. CSS classes are created in the Web page.
- D. CSS IDs are created in the Web page.

Answer: D

QUESTION NO: 4

You create a Flash Image Viewer by using GIF files stored in the images folder of a site. The Flash Image Viewer file is saved in a separate folder. When you preview the Flash Image Viewer

in the Web browser, you see a blank animation. Why does this happen?

- A. The Flash Image Viewer and the GIF files are stored in different folders.
- B. The frameShow option in Flash Image Viewer is set to Yes in the Flash element panel.
- C. The imageLinks option in the Flash Image Viewer does not provide links to images in the Flash element panel.
- D. The Flash Image Viewer can only show SWF and JPEG files.

Answer: D

QUESTION NO: 5

You have attached an external CSS file to a Web page. You have also applied a CSS rule from the external CSS file to a paragraph. You want to edit the CSS rule applied to the paragraph. What should you do?

- A. Edit the CSS rule using the collapsible CSS/Accessibility section of the Attributes panel.
- B. Edit and change the Style attribute in the Property Inspector.
- C. Edit the CSS rule using CSS Styles panel.
- D. Edit the CSS rule using the Quick tag editor.

Answer: C

QUESTION NO: 6

You want to set the default encoding for an HTML page. What should you do?

- A. Use the New Document category.
- B. Use the Code Rewriting category.
- C. Use the File Types / Editors category.
- D. Use the Code Format category.

Answer: A

QUESTION NO: 7

What is the recommended method for sharing code across Web pages? (Choose two.)

- A. Copy the code across all Web pages.
- B. Save the code in a text file and share the text file in a folder.
- C. Create a snippet and share the snippet in a folder.

D. Create external JavaScript files.

E. Create a Java applet.

Answer: C,D

QUESTION NO: 8

You place a Flash animation in the AP Div element on a Web page so that the animation is positioned on top of the content text. When you preview the Web page in a Web browser, you are unable to see the content text after the animation completes. Instead, you see the background color of the Flash animation. You want to see the text when the Flash animation completes. What should you do?

A. Use the WMODE parameter to set the background color.

B. Use Timelines and resize the AP Div element.

C. Use the Grow/Shrink behavior to resize the animation.

D. Set the background color to Default Color.

Answer: A

QUESTION NO: 9

There are three paragraphs of text on a Web page. You apply an inline CSS style to the text as follows:

First paragraph:

style="font-family:Arial, Helvetica, sans-serif; font-size:12px; color:#CC0000" Second paragraph:

style="font-size:13px; color:#CCCC00"

Third paragraph:

style="font-family:Verdana, Helvetica, sans-serif; color:#CC0000"

You convert the inline CSS in the first paragraph to a CSS rule in an external CSS file. You also convert the inline CSS in the second paragraph to a CSS Rule in the Head section of the Web page while selecting all <p> tags in the Convert to option. Which CSS attributes are applied to the third paragraph?

A. font-family:Arial, Helvetica, sans-serif; font-size:12px;
color:#CC0000

B. font-family:Verdana, Helvetica, sans-serif; color:#CC0000;
font-size:13px

C. font-family:Verdana, Helvetica, sans-serif; color:#CC0000
