---

**QUESTION NO: 1**

Which method is LEAST intrusive to check the environment for known software flaws?

- A. Port scanner
- B. Vulnerability scanner
- C. Penetration test
- D. Protocol analyzer

**Answer: B**

**QUESTION NO: 2**

On a remote machine, which action will you usually take to determine the operating system?

- A. MAC flooding
- B. System fingerprinting
- C. DNS spoofing
- D. Privilege escalation

**Answer: B**

**QUESTION NO: 3**

For the following sites, which one has the means (e.g. equipment, software, and communications) to facilitate a full recovery within minutes?

- A. Cold site
- B. Hot site
- C. Warm site
- D. Reciprocal site

**Answer: B**

**QUESTION NO: 4**

Which description is true about the process of securely removing information from media (e.g. hard drive) for future use?

- A. Deleting
- B. Reformatting
- C. Sanitization

---

D. Destruction

**Answer: C**

**QUESTION NO: 5**

Choose the access control method which provides the most granular access to protected objects?

- A. Capabilities
- B. Access control lists
- C. Permission bits
- D. Profiles

**Answer: B**

**QUESTION NO: 6**

Why malware that uses virtualization techniques is difficult to detect?

- A. The malware may be implementing a proxy server for command and control.
- B. A portion of the malware may have been removed by the IDS.
- C. The malware may be using a Trojan to infect the system.
- D. The malware may be running at a more privileged level than the antivirus software.

**Answer: D**

**QUESTION NO: 7**

- A. TCP/IP hijacking
- B. DoS
- C. DDoS
- D. Man-in-the-middle

**Answer: C**

**QUESTION NO: 8**

---

You work as the network administrator at certways .com. The certways .com network uses the RBAC (Role Based Access Control) model. You must plan the security strategy for users to access resources on the certways .com network. The types of resources you must control access to are mailboxes, and files and printers. Certways.com is divided into distinct departments and functions named Finance, Sales, Research and Development, and Production respectively. Each user has its own workstation, and accesses resources based on the department wherein he/she works. You must determine which roles to create to support the RBAC (Role Based Access Control) model. Which of the following roles should you create?

- A. Create mailbox, and file and printer roles.
- B. Create Finance, Sales, Research and Development, and Production roles.
- C. Create user and workstation roles.
- D. Create allow access and deny access roles.

**Answer: B**

#### **QUESTION NO: 9**

What technology is able to isolate a host OS from some types of security threats?

- A. Kiting
- B. Virtualization
- C. Cloning
- D. Intrusion detection

**Answer: B**

#### **QUESTION NO: 10**

Which method could identify when unauthorized access has occurred?

- A. Implement session termination mechanism.
- B. Implement previous logon notification.
- C. Implement session lock mechanism.
- D. Implement two-factor authentication.

**Answer: B**

#### **QUESTION NO: 11**

On the topic of the DAC (Discretionary Access Control) model, choose the statement(s) which are TRUE.
