Note: The answer is for reference only, you need to understand all question.

### QUESTION 1

An organization is using cloud storage to back up their employees' desktop data. The backup application running at the organization's data center ensures moderate performance while backing up data.

The application completes the entire backup within the stipulated backup window. By leveraging cloud storage service, the backup application meets high-availability and high-recoverability requirements of employees' data.

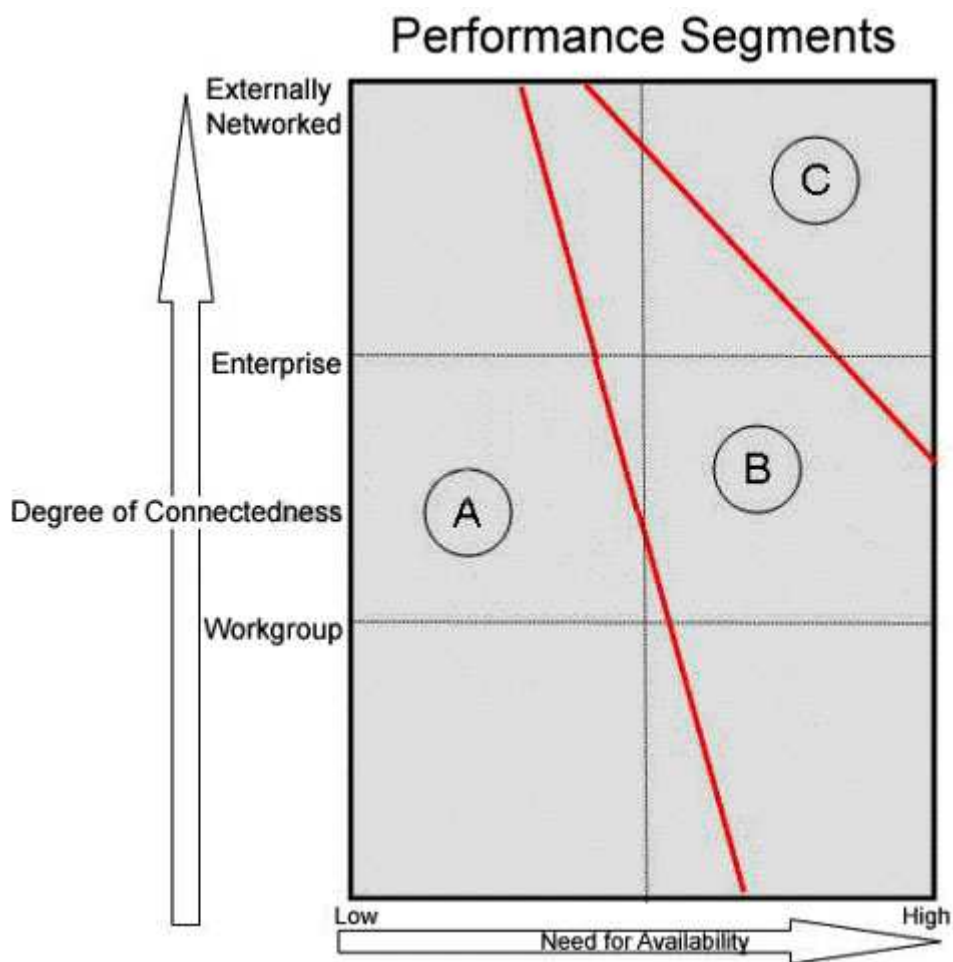

Based on the exhibit, which section accurately represents this application?

- A. A
- B. C
- C. D
- D. F

Answer: C

### QUESTION 2

Areas A, B, and C are three performance segments that represent demands of application classes.

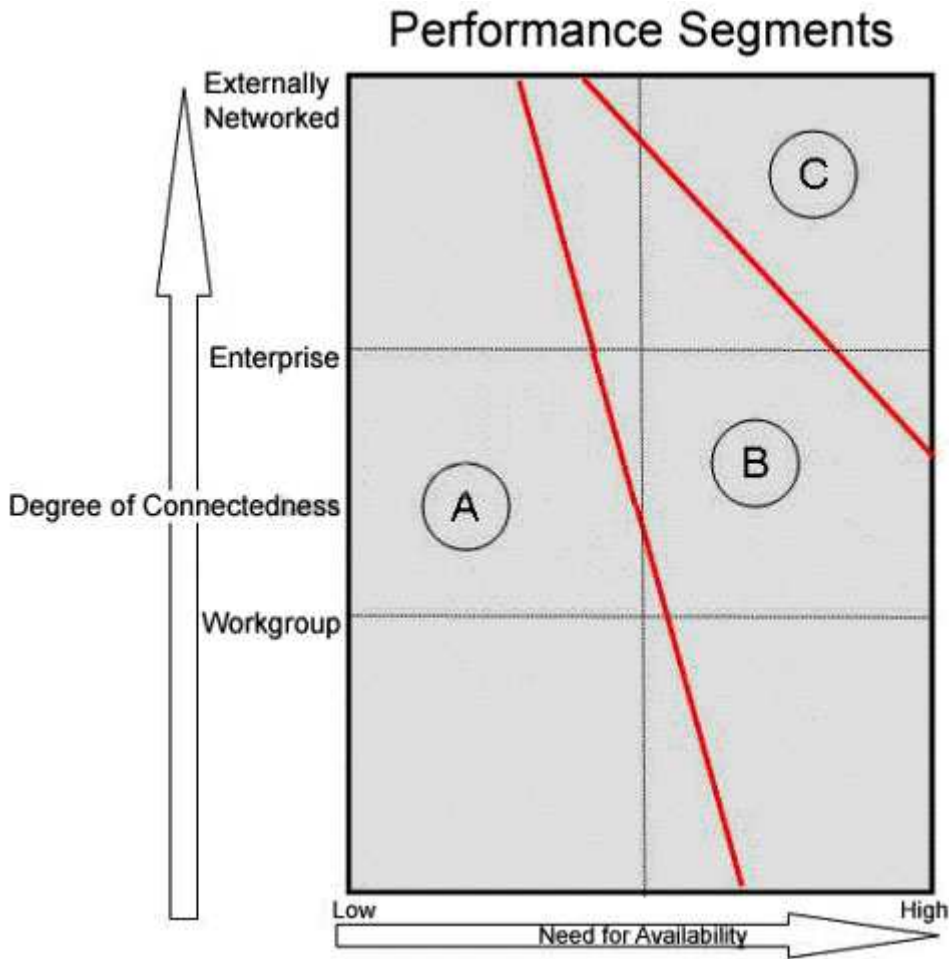

Which application performance need is illustrated by Segment B in the exhibit?

- A. Availability
- B. Interoperability
- C. Ease of management
- D. Throughput

**Answer: A**

**QUESTION 3**

Areas A, B, and C are three performance segments that represent demands of application classes.

Which application performance need is illustrated by Segment C in the exhibit?

- A. Throughput
- B. Availability
- C. Interoperability
- D. Ease of management

**Answer: A**

**QUESTION 4**

A company's business operations depend on the following three applications:

A = Supply chain management

B = CAD/CAE (design)

C = e-Commerce

Which application classes are associated with these applications?

- A. A=Enterprise;B=Workgroup; C=Externally networked
- B. A=Externally networked; B=Workgroup; C=Enterprise
