- A. Disk devices size vs. disk devices quantity
- B. Cache high-water mark setting
- C. Implementing RAID-1 as opposed to RAID-5
- D. Read cache size

Answer: A

QUESTION NO: 5

When can you accelerate storage requests through the change control process?

- A. End users have been given adequate warning about the storage change
- B. Benefits of storage change exceed the risks incurred from inadequate testing
- C. Storage request incurs no risk to other services
- D. Storage request is within the capacity plan

Answer: D

QUESTION NO: 6

What is the most important reason for knowing the component limits of the technology proposed for a client solution?

-
- A. Ensure the solution has maximum capabilities
 - B. Ensure the solution carries minimum risk
 - C. Ensure the solution is sufficiently scalable
 - D. Ensure the solution fits functional requirements

Answer: D

QUESTION NO: 7

An application requires:

85 IOPS sustained throughput per LUN

2.19 Terabytes of storage

4 HBAs

40 LUNs

DMX Storage

Array Assume each physical 146 GB drive can sustain 170 IOPS, and that the application performs approximately 25% writes and 75% reads.

What is the minimum number of physical mirrored drives (RAID 1) necessary to satisfy just these requirements?

- A. 20 Total drives
- B. 40 Total drives
- C. 60 Total drives
- D. 30 Total drives

Answer: D
