- A. only Retention Policy Services (RPS)
- B. Retention Policy Services (RPS) and Enterprise Content Services (ECS)
- C. Content Storage Services (CSS)
- D. only Enterprise Content Services (ECS)

Answer: A

QUESTION NO: 7

A new Documentum customer without any experience with Content Management systems has decided to purchase Documentum for its out-of-the-box functionality. They have general requirements for their users to have web access to basic content storage, library services, full-text search, and workflow.

Besides Content Server and Index Server at a minimum which solution would meet this

customer's requirements?

- A. Webtop only
- B. Webtop and Process Suite
- C. Process Suite only
- D. TaskSpace and Process Suite

Answer: A

QUESTION NO: 8

An insurance company has standardized the client desktop on the Microsoft Office platform. The company designed a claim Documentum workflow on Microsoft Word documents. The workflow needs to be manually initiated by the user. Users would prefer a more integrated solution so that they do not need to launch multiple applications to start a workflow.

Which product meets these requirements?

- A. Webtop
- B. Application Connectors
- C. Process Integrator
- D. Web Development Kit (WDK) applications

Answer: B

QUESTION NO: 9

A company has a requirement to develop an application to manage a group of documents in a folder through a business process. As the folder progresses, the different document types in that folder change security based on status, their type, as well as the values of different attributes for those different types.

They are deciding whether to use Documentum workflow or an external workflow system.

Which type of configuration or customization will support the functionality without committing to using Documentum versus a third-party workflow tool?

- A. policy configuration only
- B. policy configuration plus customization
- C. process configuration only
- D. process configuration plus customization

Answer: B
