VNX Solutions Specialist Exam for Technology
Architects

DEMO

QUESTION NO: 1

You are proposing a storage solution using a VNX system. What will you tell the storage administrator about the default setting for VNX IP address filtering?

A. Access is limited to a single Unisphere client.
B. IP address filtering does not restrict any access.
C. IP address filtering is not installed by default.
D. IP address filtering prevents all communications until the VNX system is configured.

Answer: B
Explanation:

QUESTION NO: 2

Which protocol does VNX support for encrypted network management activities?

A. SSH
B. PKI
C. IPSec
D. LDAP

Answer: A
Explanation:

QUESTION NO: 3

In order to ensure that role-based access is enforced, the VNX storage domain has implemented two administrative groups called Auditors and Storage Admins. One of the administrators is a member of both groups. What access to objects will that administrator inherit?

A. The least restrictive privilege established by the two groups
B. The most restrictive privilege established by the two groups
C. The first group that the administrator joined
D. The last group that the administrator joined

Answer: A
Explanation:

QUESTION NO: 4

You are supporting a customer whose VNX hostname has recently changed. Immediately after this change, the VNX administrators begin to receive certificate errors when they attempt to connect to the array. You need to advise them on how to regenerate the Control Station's certificate authority and web server certificates.

Which command should be used?

A. server_certificate
B. server_security
C. nas_ca_certificate
D. nas_license

Answer: C
Explanation:

QUESTION NO: 5

What is the length of RSA keys used to encrypt and decrypt network traffic in a VNX environment?

A. 2048 bits
B. 1024 bits
C. 2048 bytes
D. 1024 bytes

Answer: A
Explanation:

QUESTION NO: 6

What command produces audit summaries for the Control Station?

A. /sbin/aureport
B. /sbin/ausearch
C. /sbin/auditctl
D. /sbin/service

Answer: A
Explanation:

QUESTION NO: 7

What is a valid statement about the characteristics of certificates on the VNX system?

A. Default certificates are in place for SP A, SP B, Control Station(s), and Data Movers
B. Default certificates area self-signed 1024-bit RSA keys
C. All certificates are self-signed
D. Default certificates are self-signed 2048-bit RSA keys

Answer: D
Explanation:

QUESTION NO: 8

When generating a Certificate Signing Request (CSR), what is a valid statement about the certificate?

A. The Public key must be an RSA key.
B. The certificate must be set to expire within 20 years.
C. The subject's Organizational Unit Name must be set to VNX.
D. The subject's common name must be set to the Control Station's IP address.

Answer: A
Explanation:

QUESTION NO: 9

What monitoring option is used to generate file-related notifications based on a user-defined threshold?

A. Notification Logs for File
B. Background Tasks for File
C. Event Logs for File
D. Statistics for File

Answer: A
Explanation:
