- A. Use the Activate Zone function
- B. Use the Activate Zone Set function
- C. Create a new fabric
- D. Add host port and array port to a new zone
- E. Configure masking to allow host access to intended storage device

Answer: B,D,E

QUESTION NO: 3

Which cluster configuration is supported for the installation of ControlCenter components?

- A. Active/Passive single node
- B. Active/Active dual node
- C. Active/Passive dual node
- D. Active/Active single node

Answer: C

QUESTION NO: 4

Which ControlCenter task set is used to perform Symmetrix configuration management?

- A. Performance Management
- B. Monitoring
- C. ECC Administration

D. Storage Allocation

Answer: D

QUESTION NO: 5

Which three [3] components are necessary to monitor and control Symmetrix TimeFinder group operations?

- A. Host agent
- B. Symmetrix Agent
- C. Solutions Enabler
- D. Master agent
- E. SDM agent

Answer: B,C,D

QUESTION NO: 6 DRAG DROP

Click the Task button.

Arrange in order the tasks performed to plan your EMC ControlCenter environment.

Arrange in order the tasks performed to plan your EMC ControlCenter environment.

Order	Tasks in Order	
1	(place step one here)	Select infrastructure server hardware
2	(place step two here)	Determine infrastructure configuration type (single or distributed)
3	(place step three here)	Determine overall installation size of your environment
4	(place step four here)	Determine installation size of managed objects
5	(place step five here)	Confirm support of potential managed objects using the Support Matrix found on Powerlink
6	(place step six here)	List all assets with detailed information (HBAs, IP addresses, driver versions, software versions, etc.)

Actual Tests

Answer:

Arrange in order the tasks performed to plan your EMC ControlCenter environment.

Order	Tasks in Order
1	List all assets with detailed information (HBAs, IP addresses, driver versions, software versions, etc.)
2	Confirm support of potential managed objects using the Support Matrix found on Powerlink
3	Select infrastructure server hardware
4	Determine overall installation size of your environment
5	Determine installation size of managed objects
6	Determine infrastructure configuration type (single or distributed)

Select infrastructure server hardware
Determine infrastructure configuration type (single or distributed)
Determine overall installation size of your environment
Determine installation size of managed objects
Confirm support of potential managed objects using the Support Matrix found on Powerlink
List all assets with detailed information (HBAs, IP addresses, driver versions, software versions, etc.)

QUESTION NO: 7

Which two [2] characteristics describe functions of ControlCenter sub-agents?

- A. Passes information updates to the Repository
- B. Runs user commands for disk groups, volume and filesystem configuration
- C. Displays control, monitoring, and performance data for managed objects
- D. Controls, collects data and monitors one or more storage objects

Answer: B,D

QUESTION NO: 8 DRAG DROP

Click the Task button.

Match the agent with the object that it manages.
