QUESTION NO: 1

How are multiple retention categories supported with EmailXtender?

- A. A single EmailXtender folder may be assigned multiple retention periods to ensure that duplicate messages are removed.
- B. A new EmailXtender folder must be created for each unique retention category. Messages classified to multiple folders are duplicated.
- C. Multiple EmailXtender folders must be created, each supporting a different retention period. However, duplicate messages may be removed if the folders reference the same containers and volume set.
- D. Multiple EmailXtender folders may be created, each supporting a different retention period. Duplicate messages are removed across folders automatically.

Answer: B
