QUESTION NO: 1

A consultant onsite has installed the EmailXtender base and Administrator. The listener has been installed to a Domino server running on a Windows 2000 Advanced Server machine. The EmailXtender server has been restarted and configured to pull from the EXmail box with changes activated, but no mail is being pulled. What should be done next?

A. The Notes Client version should be checked to make sure that a connection is possible.
B. The Domino server component should be restarted.
C. The Notes ACLs should be checked to assure "activate" rights for the EmailXtender user.
D. The Windows 2000 server should be rebooted to register the listener in the registry.

Answer: B

QUESTION NO: 2

EmailXtract has been implemented using both the shortcut and delete tasks. How can a deleted message be restored?

A. The user can restore a message from the Search Plug-In by using the "Copy Message to Folder" function.
B. The administrator can restore a message by running an EmailXtract Search task with the "Restore Message" checkbox enabled.
C. The user can select the "Restore All" checkbox and then perform a search using the Search Plug-In.
D. The administrator can perform an Archive Restore task from the EmailXtender Administrator.

Answer: A

QUESTION NO: 3

What must be done before installing the EmailXtender Domino listener on a Windows 2000 Advanced Server machine?

A. The \Lotus\Domino program directory should be added to the path in the environment variables.
B. The client.cfg file should be added to the path in the environment variables on the Domino server.
C. The ADS permissions on the Domino program directory should be set to "Change" so that the EXadmin service account can access it.
D. The notes.ini file must be moved to the root of C:\.

Answer: A

QUESTION NO: 4

A securities company has 4000 users split between Paris, Zurich, and London. Each site has two Domino servers and a connection to the Internet for incoming and outgoing email. The connections between the sites are high-speed and utilization is moderate. What should you do to ensure that all communications are forwarded to the EmailXtender server?

A. You install a central EmailXtender server in Paris, install the EmailXtender Domino listener on all Domino servers, and configure EmailXtender
to pull from all mail servers.
B. You install EmailXtender in Paris and use EmailXtract to gather all email from all Domino servers at night when traffic slows down.
C. You install an EmailXtender server at each site. Since each site has its own connection to the Internet, this configuration will be required to
assure that all incoming, outgoing, and site specific email will be captured.
D. You install a central EmailXtender server in Paris; install the listener only on the Paris servers. You create a task in EmailXtract to pull all email
from London and Zurich at night when traffic slows down.

Answer: A

QUESTION NO: 5

An archive task recently stopped running without completing. After running the task again, it stops without completing. What should you do to determine why the task did not succeed?

A. run the task again with Message Detail selected in the Logging tab
B. run the task with Server Summary selected in the Logging tab
C. run the task with Mailbox Summary selected in the Logging tab
D. run the task with Severe Errors Only selected in the Logging tab

Answer: A

QUESTION NO: 6

EmailXtender has one folder with a rule to capture "allbrokers" and retain for two years. An EmailXaminer review group is set to retain for three years for the "allbrokers" group. Which statement is true about a sample set at 2.5 years in the EmailXaminer client?

A. Messages cannot be viewed but reports can still be run.

B. Messages can be viewed in the sample set and reports can be run.

C. Messages can be viewed but reports cannot be run.

D. Messages cannot be viewed and reports cannot be run.

Answer: A
