QUESTION NO: 1

You need a storage solution with both SCSI-based and ATA-based drives in a two-tier data protection model. Which HP StorageWorks solutions meet this requirement? Select THREE.

A. MSA500
B. MSA1000
C. MSA20
D. MSA30
E. MSA1500cs

Answer: C,D,E

QUESTION NO: 2

Which level of access is needed to clear the Version Control Repository log?

A. Guest
B. User
C. Operator
D. Owner

Answer: C

QUESTION NO: 3

Which software solution can create virtual servers running multiple operating systems on HP ProLiant platforms?

A. nPar for ProLiant Server
B. Virtual Platform for ProLiant Server
C. Microsoft Virtual Server
D. vPar for ProLiant Server

Answer: C

QUESTION NO: 4

Which type of solutions can reduce the risk factor and financial losses caused by x86 infrastructure failure in a Small and Medium Business (SMB)? Select THREE.

A. hot-swap processors

B. high availability clustering

C. proper data protection on tape

D. data replication offsite

E. smart aware architecture

Answer: B,C,D

QUESTION NO: 5

What is the correct way to install Red Hat Enterprise Linux 3.0 on a ProLiant DL380 G4?

A. Use the assisted installation option of SmartStart.

B. Download the server's specific drivers to the etc\OEMdrivers folder before starting a manual installation.

C. Use the vendor-supplied operating system media to begin the manual installation process.

D. Create a driver diskette to be used with a SmartStart manual installation.

Answer: C

QUESTION NO: 6

When monitoring from an HP Systems Insight Manager (HP SIM) server, you notice that all SNMP traps from the mail server are received twice. What could be the reason?

A. There are 2 community strings created on the mail server.

B. The mail server is discovered twice in HP SIM.

C. There are 2 versions of management agents running on the mail server.

D. The RILOE II board in the mail server is set to forward traps to HP SIM as well.

Answer: D

QUESTION NO: 7

Which RAID level does the SmartArray controller configure by default when 6 hard drives are installed?

A. RAID 1+0

B. RAID 0

C. RAID 6 (ADG)

D. RAID 5

Answer: D

QUESTION NO: 8

When setting up a data center, how would you install an HP Modular Cooling System? Select TWO.

A. as an option inside an existing HP 10000 G2 series rack
B. as an option inside a new HP 5000 series rack
C. in a datacenter with at least 59" (150cm) clearance around the rack
D. adjacent to any third party rack
E. as a stand alone solution

Answer: D,E

QUESTION NO: 9

Which online utility changes the cache read/write ratio settings on a SmartArray 6404 controller?

A. Array Diagnostic Utility (ADU)
B. Array Configuration Utility (ACU)
C. Array Management Utility (AMU)
D. Options ROM Configuration for Arrays (ORCA)

Answer: B

QUESTION NO: 10

Your customer complains that even during idle time the server Ultra320 SCSI hard drives are working. They are worried that it may cause performance problems. What will you tell this customer?

A. The hard drive activity is caused by the Dynamic Sector Repair feature and it has no impact on performance.
B. The hard drive activity is caused by the internal backup process of RAID configuration and the impact on performance is minimal.
C. The server has postponed writes from previous day which causes hard drive activity and huge impact on performance.
D. The server is performing Drive Protection System tests and, depending on drive speed and type, the impact on performance might be huge.
