---

**QUESTION NO: 1**

What is an XC cluster?

- A. a Network Load Balancing server running on a Linux operating system
- B. an HP ProLiant cluster running Netware 6 with support for up to 12 nodes
- C. multi-node Microsoft Windows 2003 cluster designed for Oracle databases
- D. scalable, Linux-based production resource for high performance computing

**Answer: D**

**QUESTION NO: 2**

What is the correct HP StorageWorks Modular Smart Array model to use for an entry-level to midrange storage area network (SAN)?

- A. MSA20
- B. MSA50
- C. MSA500
- D. MSA1000

**Answer: D**

**QUESTION NO: 3 DRAG DROP**

Click the Task button.

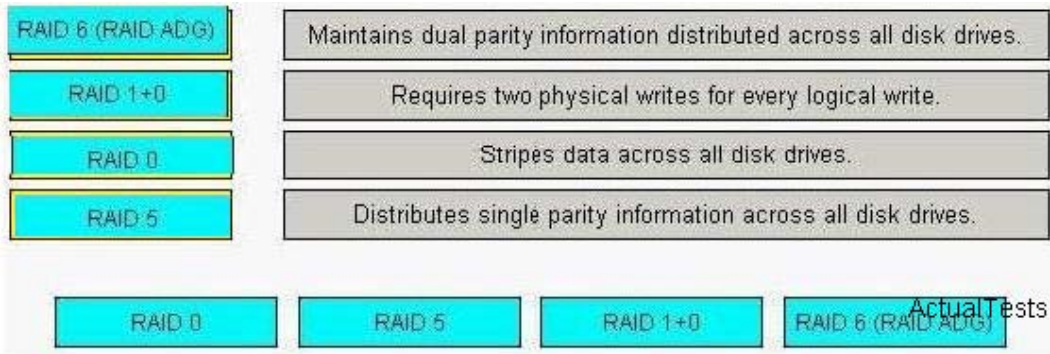

Match the RAID level with its correct feature.

(place here)	Maintains dual parity information distributed across all disk drives.
(place here)	Requires two physical writes for every logical write.
(place here)	Stripes data across all disk drives.
(place here)	Distributes single parity information across all disk drives.

RAID 0    RAID 5    RAID 1+0    RAID 6 (RAID ADG)

Actual Tests

**Answer:**

**QUESTION NO: 4**

Which memory type can detect and correct 4-bit errors in a single byte?

- A. Parity
- B. RAID memory
- C. Standard ECC
- D. Advanced ECC

**Answer: B**

**QUESTION NO: 5**

Which features are included with the HP Modular Cooling System? (Select three.)

- A. 14 to 47U heights
- B. hot-swappable components
- C. perforated front and back doors
- D. support of up to 30KW per rack
- E. support for very high density hardware
- F. loading capacity up to 1500 lbs (680 kg)

**Answer: B,D,E**

**QUESTION NO: 6**

Which self-contained storage solution transfers data using industry-standard file-sharing protocols?

- A. storage area network (SAN)
- B. SCSI attached storage (SAS)
- C. direct attached storage (DAS)

---

D. network-attached storage (NAS)

**Answer: D**

**QUESTION NO: 7**

Which StorageWorks enclosure delivers the ideal mix of low cost and high capacity, has Ultra320 SCSI host connectivity and uses Serial ATA (SATA) drives?

- A. StorageWorks MSA20
- B. StorageWorks MSA30
- C. StorageWorks MSA50
- D. StorageWorks MSA500

**Answer: A**

**QUESTION NO: 8**

How can you identify whether a customer has the enhanced server blade enclosure?

- A. a G2 label on the left front side of the enclosure
- B. a G2 label on the management module in the rear of the enclosure
- C. a dedicated iLO port on the management module in the rear of the enclosure
- D. a dedicated iLO 2 port on the management module in the rear of the enclosure

**Answer: C**

**QUESTION NO: 9**

Which host-based application provides pooling of physical storage devices and dynamic growth of virtual or basic disk partitions?

- A. HP OpenView DataProtector
- B. HP OpenView Storage Mirroring
- C. HP OpenView Virtual Machine Manager
- D. HP OpenView Storage Virtual Replicator

**Answer: D**

**QUESTION NO: 10**
