For the most up-to-date exam questions and materials, we recommend visiting our website, where you can access the latest content and resources.

Note: The answer is for reference only, you need to understand all question.

#### QUESTION 1

What is a benefit of connecting servers to the SAN one HBA at a time?

- A. It guarantees the connections are properly documented.
- B. It allows the switch time to balance the load.
- C. It prevents having to reboot the server.
- D. It allows verification that the HBA properly logs into the fabric.

**Answer: D**

#### QUESTION 2

A customer wants to implement a new c-Class blade environment and connect it as an edge device in an existing fabric and Ethernet network. Which cost-effective converged network interconnect device should you recommend to help reduce the resultant network sprawl by up to 95%?

- A. HP StorageWorks 4Gb SAN Switch for HP c-Class BladeSystem (Brocade 4024)
- B. HP StorageWorks 400 Multiprotocol Router
- C. HP Virtual Connect FlexFabric 10Gb/24-port Modules
- D. HP Storage Works 4/32 SAN Switch with Access Gateway enabled

**Answer: C**

#### QUESTION 3

What is a feature of a B-series switch license upgrade?

- A. inter-switch link (ISL) trunking
- B. zero E-port capability
- C. advanced WebTools
- D. zoning

**Answer: A**

#### QUESTION 4

When powering down the SAN, what is an exception that would change the power down sequence?

- A. The physical layout of the SAN devices is modified.

- B. A non-standard sequence is used for power on.
- C. A server is needed to run device management software.
- D. Data in the cache is previously flushed.

**Answer: C**

#### **QUESTION 5**

Which port type is used by building an LSAN on supported B-series 8Gb SAN Switches to provide the routed paths between routed fabrics?

- A. VEX\_Port
- B. E\_Port
- C. EX\_Port
- D. TE\_Port

**Answer: C**

#### **QUESTION 6**

Which software utility can be installed by customers and used to perform SAN analysis and diagnostics without supervision by an HP engineer?

- A. SAN Visibility
- B. SANXpert
- C. ScanMaster
- D. HPCC for SAN

**Answer: A**

#### **QUESTION 7**

A customer needs a scalable SAN infrastructure and wants to add ports when they are needed. Which B-series switch offers license upgrades in 16-port increments?

- A. HP StorageWorks SAN Director 4/256
- B. HP StorageWorks 8/40 SAN Switch
- C. HP StorageWorks 8/80 SAN Switch
- D. HP StorageWorks DC04 SAN Director

**Answer: C**

**QUESTION 8**

During the installation of an HP StorageWorks SN6000 Fibre Channel Switch there is a fatal POST error. How is this indicated by the switch?

- A. Fault light flashing red
- B. blinking LED and audible alarm
- C. audible alarm only
- D. blinking heartbeat LED display

**Answer:** D

**QUESTION 9**

You are installing Cisco MDS switches into a SAN environment. Which command allows you to verify the status of all Fibre Channel interfaces?

- A. show ports brief
- B. switchshow
- C. list port allocation
- D. show interface brief

**Answer:** D

**QUESTION 10**

What is the purpose of the DCFM Firmware Management checkbox labeled Overwrite current firmware?

- A. allows a user to re-apply the same version of firmware
- B. write enables the NVRAM to allow firmware updates
- C. enables updates of both copies of firmware
- D. allows users to downgrade the version of firmware

**Answer:** A

**QUESTION 11**

A customer wants to upgrade an HP H-series SN6000 SAN Switch. What is the minimum number of ports that can be enabled by a port upgrade license?

- A. 1
- B. 4
