**QUESTION NO: 1**

You work as a Network Administrator at ABC.com. The ABC.com network is configured as a single Active Directory Domain Services (AD DS) domain with servers that run Windows Server 2008 R2 and Windows Server 2012.

You have been tasked with the deployment of a new Microsoft Dynamics CRM 2013 on-premise system.

You have a Windows Server 2012 Web Server named ABC-Web1. You create a website named Site1 on ABC-Web1. You want to install Microsoft Dynamics CRM 2013 into Site1 on ABC-Web1.

You do not want to use the default URL for the Microsoft Dynamics CRM 2013. You want to use a different URL.

Which of the following actions should you perform?

- A. Configure a host header value and binding for Site1.
- B. Disable the Default Web Site on ABC-Web1.
- C. Configure an MX record in DNS to point to ABC-Web1.
- D. Configure a host (A) record in DNS to point to ABC-Web1.
- E. Install Microsoft Dynamics CRM 2013 and select Site1.
- F. Install Microsoft Dynamics CRM 2013 into the Default Web Site.

**Answer: A,D,E**

**Explanation:**

**QUESTION NO: 2**

You work for a company named ABC.com. Your role of Systems Administrator includes the management of the company's Microsoft Dynamics CRM Online system.

A user named Mia has joined the company. You need to enable Mia to use Dynamics CRM Online.

Which of the following steps should you perform first?

- A. Log in to Dynamics CRM Online and assign a license to Mia.
- B. Log in to Microsoft Online Services Portal and assign a license to Mia.
- C. Log in to Dynamics CRM Online and create a user account for Mia.
- D. Log in to Microsoft Online Services Portal and create a user account for Mia.

---

**Answer: D**

**Explanation:**

**QUESTION NO: 3**

You work as a Network Administrator at ABC.com. The ABC.com network is configured as a single Active Directory Domain Services (AD DS) domain with servers that run Windows Server 2012.

You have been tasked with the deployment of a Microsoft Dynamics CRM 2013 Online.

After purchasing a subscription and licenses, you need to configure Microsoft Dynamics CRM 2013 Online to use the ABC.com domain for authentication.

Which of the following actions should you perform first?

- A. Log in to Microsoft Online Services Portal and add the ABC.com domain.
- B. Log in to Microsoft Online Services Portal and create a service request to add the ABC.com domain.
- C. Configure the external DNS MX records to point to Microsoft.
- D. Log in to Microsoft Online Services Portal and create a security group named ABC.com.
- E. Log in to Dynamics CRM Online and add the ABC.com domain.

**Answer: A**

**Explanation:**

**QUESTION NO: 4**

You work as a Network Administrator at ABC.com. The ABC.com network is configured as a single Active Directory Domain Services (AD DS) domain.

The network includes the servers shown in the following table:

Server Name	Operating System	Version
Server1	Windows Server 2008 Service Pack 1	Enterprise (64-bit)
Server2	Windows Server 2008 R2 Service Pack1	Standard (64-bit)
Server3	Windows Server 2012	Server Core (64-bit)

---

Server4Windows Server 2012Standard (64-bit)

Server5Windows Server 2012DataCenter (64-bit)

Server6Windows Server 2012Essentials (64-bit)

You have been tasked with the deployment of a new Microsoft Dynamics CRM 2013 on-premise system.

You need to decide which server to install Microsoft Dynamics CRM 2013 onto.

Which of the servers listed in the table could you use for the Microsoft Dynamics CRM 2013 installation? (Choose all that apply)

- A. Server1
- B. Server2
- C. Server3
- D. Server4
- E. Server5
- F. Server6

**Answer: B,D,E**

**Explanation:**

#### **QUESTION NO: 5**

You work for a company named ABC.com. Your role of Systems Administrator includes the management of the company's Microsoft Dynamics CRM Online system.
