Answer: A,B,D

Explanation:

QUESTION NO: 2

You work as a Systems Administrator at ABC.com. The company has recently deployed a Microsoft Dynamics NAV 2013 system.

You have created a document page to represent a transaction.

Which three of the following modifications could a user with the appropriate permissions make to personalize the document page? (Choose three)

- A. A user can mark fields as Promoted, Standard, and Additional.
- B. A user can copy department links to his or her Role Center.
- C. A user can move, rename, or remove buttons in the navigation pane.
- D. A user can move fields between FastTabs.

Answer: A,B,C

Explanation:

QUESTION NO: 3

You work for a company named ABC.com. The ABC.com network consists of an Active Directory

Domain Services (AD DS) domain named ABC.com. All servers run Windows Server 2008 R2 and all client computers run Windows 8 Pro.

Your role as Systems Administrator includes the management of the company's Microsoft Dynamics NAV 2013 system.

A computer named ABC-Shared01 is used by multiple users. ABC-Shared01 has the Microsoft Dynamics NAV 2013 RoleTailored client for Windows installed.

You need to ensure that no personalization changes are made to the RoleTailored client on ABC-Shared01.

How should you disable personalization?

- A. By selecting the Disable Personalization check box in the profile.
- B. By opening the client from a command prompt and specifying the disablepersonalization parameter.
- C. By clearing the Enable Personalization check box in the profile
- D. By configuring a mandatory user profile.

Answer: B

Explanation:

QUESTION NO: 4

You work as a Systems Administrator at ABC.com. The company has recently deployed a Microsoft Dynamics NAV 2013 system.

You have been asked to modify the Home Items for a user named Mia.

How can you add an action to the Home Items for Mia without affecting other users?

- A. Use the Object Designer to modify the Task Window.
- B. Open the RoleTailored client from the command prompt and specify the –configure option.
- C. Use the Action Designer to modify the Role Center.
- D. Use the Object Designer to modify the Navigation Pane.

Answer: C

Explanation:

QUESTION NO: 5

You work as a Systems Administrator at ABC.com. The company has recently deployed a Microsoft Dynamics NAV 2013 system.

Another administrator has created a profile named Operator1. You need to open the Microsoft Dynamics NAV Windows client in configuration mode to configure the profile.

What should you do first?

- A. Rename the profile.
- B. Configure the profile as a default profile.
- C. Configure your account as the profile owner.
- D. Open a command prompt as Administrator.
- E. Enable personalization for the profile.

Answer: C

Explanation:

QUESTION NO: 6

You work as a Systems Administrator for a company named ABC.com. The ABC.com network consists of an Active Directory Domain Services (AD DS) domain named ABC.com. All servers run Windows Server 2008 R2 and all client computers run Windows 7 Professional.

You are planning the deployment of Microsoft Dynamics NAV 2013 in a three-tier infrastructure. Where possible, server roles will be installed on separate server computers.

You plan to include the default Microsoft Dynamics NAV 2013 components plus the following additional components:

- Microsoft Dynamics NAV Portal Framework for Microsoft SharePoint to enable you to build SharePoint web applications that display Microsoft Dynamics NAV pages and reports.
- Automated Data Capture System to enable company employees to use handheld devices to continuously validate warehouse inventories.

To secure the Microsoft Dynamics infrastructure, you need to ensure that the Microsoft Dynamics NAV service tier can be started and used by only the additional components listed above and SQL Server.

What should you configure?
