Note: The answer is for reference only, you need to understand all question.

Exam A

QUESTION 1

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you have to install Microsoft Dynamics NAV 2009 in the network. During the deployment, you use one software distribution point and publish the installation package to the group policy objects. But an employee named Jason reports that he still does not have Microsoft Dynamics NAV installed. So what is the reason for this?

- A. This is because the installation package is corrupted
- B. This is because the software distribution point is not accessible.
- C. This is because the corresponding group policy object does not run.
- D. This is because the client computers do not meet the minimum requirements for the installation.

Answer: C

QUESTION 2

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. There are two departments in your company, one is Sales department, another is Account department. The company manager assigns a task to you that you implement Microsoft Dynamics NAV 2009. When you do this, you must make sure that each division uses its own instance of the database server; users in one of the divisions are not bound to certain computers. So which deployment configuration do you suggest?

- A. You suggest one GPO, One SDP, and one installation package.
- B. You suggest one GPO, Two SDPs, and one installation package.
- C. You suggest two GPOs, Two SDPs, and two installation packages with different configuration files.
- D. You suggest two GPOs, One SDP, and two installation packages with different configuration files.

Answer: D

QUESTION 3

You work in an international company which is called Wikigo. And you're employed as the Developer for Microsoft Dynamics NAV. According to the requirements of your company manager, Microsoft Dynamics NAV 5.0 has been installed throughout your company. Now the company has a new plan that is to implement Microsoft Dynamics NAV 2009 instead of Microsoft Dynamics NAV 5.0. But at present you are connecting to external components by using the NAS component of Microsoft Dynamics NAV 5.0. In working with external components using NAS in the two-tier architecture, which drawback does the Server tier in the three-tier

architecture enable you to eliminate?

- A. The Server tier in the three-tier architecture enables you to eliminate the drawback of losses of data.
- B. The Server tier in the three-tier architecture enables you to eliminate the drawback of necessity to use the NAS user interface.
- C. The Server tier in the three-tier architecture enables you to eliminate the drawback of limitation to only one process at a time.
- D. The Server tier in the three-tier architecture enables you to eliminate the drawback of overload of the database management system.

Answer: C

QUESTION 4

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. You publish Microsoft Dynamics NAV 2009 to a user, in order to make the deployment take effect on the user's machine, what should he do? Choose the 2 that apply.

- A. He is required to log off and back on.
- B. He is required to restart the computer.
- C. He is required to go to Add or Remove Programs and run the Microsoft Dynamics NAV 2009 installation.
- D. He is required to go to Add or Remove Programs and uninstall the previous version of Microsoft Dynamics NAV.

Answer: AC

QUESTION 5

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. Your company manager assigns a task to you. You have to deploy multiple Microsoft Dynamics NAV 2009 installation packages. You are going to make the deployment with Group Policy, so what can you define software deployment properties for? Choose the 2 that apply.

- A. You can define software deployment properties for all installation packages in a GPO.
- B. You can define software deployment properties for all installation packages within an SDP.
- C. You can define software deployment properties for individual installation packages in a GPO.
- D. You can define software deployment properties for individual installation packages within an SDP.

Answer: AC

QUESTION 6

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you are deploying Microsoft Dynamics 2009 with Windows Server Group Policy, where is it necessary to store the installation source?

- A. It's necessary to store the installation source on a local CD/DVD.
- B. It's necessary to store the installation source on a network share.
- C. It's necessary to store the installation source in a folder on a local hard disk.
- D. It's necessary to store the installation source on the computer running Windows Server.

Answer: B

QUESTION 7

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you have to deploy Microsoft Dynamics NAV 2009. In the options below, which step is required by the published Microsoft Dynamics NAV 2009 deployment? Choose the 2 that apply.

- A. A published Microsoft Dynamics NAV 2009 deployment requires restarting the computer running Windows Server.
- B. A published Microsoft Dynamics NAV 2009 deployment requires logging off and on or restarting the client computers.
- C. A published Microsoft Dynamics NAV 2009 deployment requires copying the Microsoft Dynamics NAV 2009 installation package to client computers.
- D. A published Microsoft Dynamics NAV 2009 deployment requires running the Microsoft Dynamics NAV 2009 installation from Add or Remove Programs on the client computers.

Answer: BD
