Network Appliance NetCache Internet Access
and Security Exam

DEMO

QUESTION NO: 1

Which FOUR will best prevent client disruption caused by hardware failure when using multiple proxies? (Choose 4)

A. transparency utilizing WCCP
B. direct browser configuration
C. autoconfiguration using a proxy.pac file
D. round-robin DNS
E. load balancer

Answer: A,C,D,E

QUESTION NO: 2

Which vector point is used to route an object to the ICAP server from NetCache, but before the data is requested from the Web server?

A. RESPMOD_PRECACHE
B. RESPMOD_POSTCACHE
C. REQMOD_POSTCACHE
D. REQMOD_PRECACHE

Answer: C

QUESTION NO: 3

Which FOUR are key steps in the authentication process? (Choose 4)

A. verify protocol authentication settings (authenticates the user)
B. verify ACL permission settings for the applicable group in the NetCache user database
C. verify whether SmartFilter or WebWasher DynaBLocator denies the request
D. allow or deny the request, based on the results of the authentication process
E. verify connectivity to logging server

Answer: A,B,C,D

QUESTION NO: 4

Of the following choices, which TWO are paths to configure logging? (Choose 2)

A. Setup > Maintenance > Logging

B. Setup > System > Logging
C. Setup > Utilities > Logging
D. Setup > HTTP > Logging

Answer: B,D

QUESTION NO: 5

Which TWO implementations are required for setting up transparency with WCCP? (Choose 2)

A. The WCCP router must be located where a firewall that uses Network Address Translation (NAT) is located between the WCCP and the NetCache appliance.
B. The WCCP router has to be directly connected to the proxy.
C. The WCCP router must be located where a firewall that uses Network Address Translation (NAT) is not located between the WCCP and the NetCache appliance.
D. The WCCP router must be located so that it can view all network traffic for the clients that it is expected to serve.

Answer: C,D

QUESTION NO: 6

The NetCache appliance supports up to _____ SNMP communities.

A. 32
B. 8
C. 4
D. 16

Answer: B

QUESTION NO: 7

The NetCache appliance supports up to _____ SNMP communities.

A. 32
B. 16
C. 4
D. 8

Answer: D

QUESTION NO: 8

Which protocol entries are recorded in the Web access log file?

A. Telnet, SNMP, SSH
B. HTTP, FTP, RTSP
C. HTTP, FTP, Gopher
D. RTSP, NNTP

Answer: C

QUESTION NO: 9

Which FOUR cache control headers below are valid? (Choose 4)

A. Cache-Control: private
B. Cache-Control: no-store
C. Pragma: no-cache
D. Pragma: do-not-cache
E. Cache-Control: no-cache

Answer: A,B,C,E

QUESTION NO: 10

Given the following service farm configuration, which request will be directed to the ICAP application?

config.icapv1.farm3.attr = \\marketing_req_precache REQMOD_PRECACHE on rr on weak

A. Requests about to be initiated by NetCache to the server
B. Requests from the client before NetCache has initiated a request to the server
C. Responses to requests initiated by NetCache before being cached on disk
D. Requests from the client after NetCache has initiated a request to the server
E. Responses to requests initiated by NetCache after being cached on disk

Answer: B

QUESTION NO: 11
