**QUESTION NO: 1**

Customers who are looking for a customizable data warehouse solution with the ability to choose their software and hardware should consider:

- A. IBM Netezza
- B. IBM DB2
- C. IBM Smart Analytics System
- D. IBM InfoSphere Warehouse

**Answer: D**

**Explanation:**

**QUESTION NO: 2**

The Unstructured Analysis component of InfoSphere Warehouse provides the ability to:

- A. create an OLAP cube within the unstructured data.
- B. use standard analysis tools to directly access unstructured data.
- C. extract knowledge from unstructured data for use by standard analysis tools.
- D. None of the above.

**Answer: C**

**Explanation:**

**QUESTION NO: 3**

What is the output of the Cubing Services Optimization Advisor?

- A. SQL scripts of MDC definitions which must be executed to take effect.
- B. SQL scripts of MQT definitions which must be executed to take effect.
- C. SQL scripts that optimize the queries being run against cubing services.
- D. SQL scripts of cube definitions which create the cubes on the server.

**Answer: B**

**Explanation:**

**QUESTION NO: 4**

---

Which statement about data flows is true?

- A. Data flows define the SQL-based data movement and transformation activities that run in a DB2 database.
- B. Data flows define the processing logic that is required to run the applications.
- C. Data flows operators have success and failure ports.
- D. Data flows can have embedded control flows.

**Answer: A**

**Explanation:**

#### **QUESTION NO: 5**

Which of the following data warehouse schemas cannot be modeled into a Cube Model object?

- A. A non-star schema.
- B. A star schema that contains a set of fact tables and a set of dimension tables that join the fact tables.
- C. A star schema in which all attributes of a dimension are stored in a single dimension table.
- D. A star schema in which some of the dimension attributes are stored in the same table where fact attributes are stored.

**Answer: A**

**Explanation:**

#### **QUESTION NO: 6**

How do you monitor the status of a running control flow?

- A. Manage Control Flows in the Admin Console
- B. Manage Instances in the Admin Console
- C. Manage Logs in the Admin Console
- D. Generate code in Design Studio

**Answer: B**

**Explanation:**

#### **QUESTION NO: 7**

---

Which of the following is not a valid InfoSphere Warehouse Data Mining technique/algorithm?

- A. Clustering.
- B. Differentiation.
- C. Classification.
- D. Association

**Answer: B**

**Explanation:**

**QUESTION NO: 8**

After creating a cube model, what step(s) is(are) required to create a cube based on a cube model?

- A. Add cube dimensions to the cube.
- B. Specify a cube hierarchy for each dimension.
- C. Add the measures to be included to the cube facts object.
- D. All of the above.

**Answer: D**

**Explanation:**

**QUESTION NO: 9**

In a control flow, which of the following can be used to control looping through an iteration process?

- A. A series of delimited items in a file.
- B. A series of files in a directory.
- C. Specification of a fixed number of operations.
- D. All of the above can be used.

**Answer: D**

**Explanation:**

**QUESTION NO: 10**
