E22-247 Data Protection Advisor 6.x Exam
Exam Description

Overview
This exam is a qualifying exam for the **Data Protection Advisor 6.x** certification.

This exam focuses on the implementation and management of Data Protection Advisor including the installation of DPA components, user credential management, configuration of backup components, remote data collection configuration and generating and interpreting reports. This exam will also cover how to build custom reports using DPA and external sources, use of operators and Smart Groups.

EMC provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.

Products
Products likely to be referred to on this exam include but are not limited to:

- Data Protection Advisor v6.2.1
- Avamar
- NetWorker
- Data Domain

Exam Topics
Topics likely to be covered on this exam include:
