

Technology Architect, Backup Recovery Solutions Specialist Version 7.0 (EMCTA)

Certification Description

[Proven Professional Website](#)

[Proven Professional Community](#)

Certification Overview

The Backup and Recovery Solutions Specialist certification formally validates your knowledge, skills and expertise in architecting and designing EMC Backup and Recovery Solutions using NetWorker, Avamar, Data Protection Advisor (DPA) and EMC Disk Library products.

Certification Requirements

To complete the requirements for this certification you must:

1. Achieve one of the following Associate level certifications:
 - Backup Recovery Solutions Associate (EMCBA)
 - Data Protection and Management Associate (EMCDPM)
 - Information Storage Associate (EMCISA)
 - Information Storage Associate Version 2 (EMCISA)
 - Information Storage Associate Version 3 (EMCISA)
2. Pass the following Specialist level exam on or after 04/29/16:
 - [E20-591 Backup Recovery Solutions Specialist Exam for Technology Architects](#)
 - E20-329 Backup Recovery Solutions Design Exam for Technology Architects

Note: These details reflect certification requirements as of **April 29, 2016**.

The Proven Professional Program periodically updates certification requirements. *Please check the [Proven Professional CertTracker](#) website regularly for the latest information and for other options to meet the Associate level requirement.

Overview

This exam is one of the qualifying exams for the **Technology Architect, Backup Recovery Solutions Specialist (EMCTA)** certification.

This exam focuses on ensuring individuals are knowledgeable in product architecture, terminology, features and functions for EMC backup recovery products: EMC Data Domain, EMC Avamar, EMC NetWorker, EMC ProtectPoint, EMC Data Protection Advisor, and EMC DPSearch. The successful candidate will demonstrate the knowledge required to appropriately position backup and recovery solutions using one or more of these products.

Dell EMC provides free practice tests to assess your knowledge in preparation for the exam. Practice tests allow you to become familiar with the topics and question types you will find on the proctored exam. Your results on a practice test offer one indication of how prepared you are for the proctored exam and can highlight topics on which you need to study and train further. A passing score on the practice test does not guarantee a passing score on the certification exam.

Products

Products likely to be referred to on this exam include but are not limited to:

- EMC Data Domain 5.7
- EMC Avamar 7.2
- EMC NetWorker 9
- EMC ProtectPoint 3.0
- EMC Data Protection Advisor 6.2.2
- EMC DPSearch 1.2

Exam Topics

Topics likely to be covered on this exam include:

EMC Backup and Recovery Solutions (5%)

- Solutions and use cases across EMC backup and recovery products

Data Domain (20%)

- Positioning and key usability scenarios
- Architecture and benefits
- Features and Options

Avamar (15%)

- Features, options, positioning, and usability scenarios
- Architecture and options

NetWorker (15%)

- Features, options, positioning, and usability scenarios
- Architecture and options

**ProtectPoint (15%)**

- Features, options, positioning, and usability scenarios
- Architecture and options

EMC Backup Monitoring and Reporting (30%)

- DPSearch features, options, positioning, and usability scenarios
- DPSearch architecture and options
- Data Protection Advisor features, options, positioning, and usability scenarios
- Data Protection Advisor architecture and options

The percentages after each topic above reflects the approximate distribution of the total question set across the exam.

Recommended Training

The following curriculum is recommended for candidates preparing to take this exam.

Please complete all of the following courses

Course Title	Course Number	Mode	Available
EMC Backup Recovery Infrastructure Solutions	MR-7TP-EMCBRIS-1601	Video ILT - Stream	01/15/2016
